SUPPLEMENTARY INFORMATION:

Regulatory Information

On August 25, 2005, we published a notice of proposed rulemaking (NPRM) entitled Drawbridge Operation Regulation; Tennessee River, Chattanooga, TN in the **Federal Register** (70 FR 49900). We received no letters

commenting on the proposed rule. No public meeting was requested, and none was held.

Background and Purpose

On February 11, 2005, the State of Tennessee Department of Transportation requested a temporary change to the operation of the Chief John Ross Drawbridge, across the Tennessee River, mile 464.1, at Chattanooga, Tennessee to allow the drawbridge to remain in the closed-to-navigation position for seven months to perform major repairs to the bridge. The drawbridge has a vertical clearance of 58.7 feet above normal pool in the closed-to-navigation position. Navigation on the waterway consists primarily of commercial tows and recreational watercraft that will be minimally impacted by the closure period. Presently, the draw opens on signal for the passage of river traffic when the vertical clearance beneath the draw is 50 feet or less. When the vertical clearance beneath the draw is more than 50 feet, at least eight hours notice is required.

The Tennessee Department of Transportation requested the drawbridge be permitted to remain in the closed-to-navigation position from 8 a.m., December 1, 2005, until 8 a.m., July 1, 2006. This temporary change to the drawbridge's schedule has been coordinated with the commercial waterway operators.

Discussion of Comments and Changes

We received no comments on the NPRM, and have made no changes from the proposed rule.

Regulatory Evaluation

This rule is not a "significant regulatory action" under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not "significant" under the regulatory policies and procedures of the Department of Homeland Security (DHS).

The Coast Guard expects this temporary change will have minimal economic impact on commercial traffic operating on the Tennessee River. There is sufficient height, when the drawbridge is closed, to allow for the vast majority of commercial users to pass.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601-612), we have considered
