SUPPLEMENTARY INFORMATION:

Background

Lake Berryessa was created as part of the Solano Project with the completion of Monticello Dam in 1957. In 1958, Reclamation and the County of Napa entered into an agreement for Napa County to assume recreational management responsibilities for the lake. A Public Use Plan (PUP) was developed by the National Park Service in 1959 to guide Reclamation and Napa County in the development of recreational facilities at the lake. In 1975, Reclamation resumed direct management of Lake Berryessa as a result of Title VI of the Reclamation Development Act of October 27, 1974 (Pub. L. 93-493), which authorizes Reclamation to provide for the protection, use, and enjoyment of the aesthetic and recreational values at Lake Berryessa. In 1987, a new planning process began to develop an updated management document for the lake. A Reservoir Area Management Plan (RAMP) was developed to provide guidance for Reclamation in management issues which were not mentioned in the PUP and to assist Reclamation in administering the lake and concession areas. Reclamation completed a Final EIS for the RAMP in 1993.

Presently there are seven concessionaires authorized by Reclamation to provide commercial support services to Lake Berryessa visitors. These seven concession contracts have been in effect since the late 1950s. One of the contracts will expire in 2007 and the other six will expire by 2009. Reclamation also administers two day-use areas and a public boat launching facility as well as numerous roadside turnouts and trails. The east side of the lake has been designated a State Wildlife Area and is managed cooperatively by Reclamation and the California Department of Fish and Game.

Visitor Services Plan (VSP)

The VSP will identify and develop the types and levels of recreation support services and facilities to be provided

both commercially and by the government at Lake Berryessa. Some of the issues to be addressed in the VSP include day use needs, long-term and short-term recreational vehicle and trailer sites, retention or elimination of exclusive long-term trailer sites as presently operated, campground development, marina development, consolidation or expansion of existing commercial operations, new services development and construction, retention or removal of existing facilities, food and beverage service needs, overnight lodging facilities, and support for marine-based activities such as fishing (individual and tournament), swimming, water skiing, etc.
