SUPPLEMENTARY INFORMATION:

Background

In providing its advice and consent to the ratification of the Chemical Weapons Convention (Convention) (S. Res. 75, April 24, 1997), the Senate included several conditions. Condition 9 of Senate Resolution 75, titled "Protection of Advanced Biotechnology," provides that the President shall certify to the Congress on an annual basis that " * * * the legitimate commercial activities and interests of chemical, biotechnology, and pharmaceutical firms in the United States are not being significantly harmed by the limitations of the Convention on access to, and production of, those chemicals and toxins listed in Schedule 1 * * *". On July 8, 2004, President Bush, by Executive Order 13346, delegated his authority to make the annual certification to the Secretary of Commerce.

In the years 2000 through 2004, BIS solicited comments from the public on the commercial impact of the Convention's Schedule 1 limitations and received no comments. In light of this, the President certified to Congress that firms were not significantly harmed by the Convention's Schedule 1 limitations. The Bureau of Industry and Security is collecting data to assist in determining the impact, if any, that the implementation of the Convention's requirements have had on commercial "Schedule 1" activities through calendar year 2005.

The Convention on the Prohibition of the Development, Production, Stockpiling, and Use of Chemical Weapons and Their Destruction, commonly called the Chemical Weapons Convention (CWC), is an international arms control treaty that establishes the Organization for the Prohibition of Chemical Weapons
