**ADDRESSES:** Written comments should be sent to: Project Manager, National Vegetation EIS, BLM Nevada State Office, P.O. Box 12000, Reno, NV 89520-0006. Comments may also be sent by e-mail to [vegeis@nv.blm.gov](mailto:vegeis@nv.blm.gov). Individual respondents may request confidentiality. If you wish to withhold your name or street address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by

law. The BLM will not consider anonymous comments. All submissions from organizations and businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be available for public inspection in their entirety. The Draft EIS and associated documents will be available for review in either hard copy or on compact disks (CDs) at all BLM State, District, and Field Office public rooms. The entire document can also be reviewed or

downloaded at the BLM National Web site <http://www.blm.gov/>.

**SUPPLEMENTARY INFORMATION:** This national, draft programmatic EIS will provide a comprehensive analysis of BLM's use of chemical herbicides in its various vegetation treatment programs related to hazardous fuels reduction, noxious weed and invasive terrestrial plant species management, resource rehabilitation following catastrophic fires and other disturbances. In addition, an accompanying environmental report will provide an

assessment of the expected impacts of the use of herbicides, in addition to other vegetation treatment methods (fire, mechanical, manual, and biological) on up to approximately 5,030,000 acres of public lands per year. Together, these documents will:

- Consider reasonably foreseeable activities, particularly hazardous fuels reduction treatments, emergency stabilization and rehabilitation efforts, noxious weed, and invasive terrestrial plant species management.

- Address human health and ecological risk for proposed use of chemical herbicides on public lands.

- Provide a cumulative impact analysis of the use of chemical herbicides in conjunction with other treatment methods.

The EIS is neither a land-use plan nor a land-use plan amendment. The EIS and ER will provide a comprehensive programmatic NEPA document and environmental report to allow effective tiering and incorporation by reference of baseline cumulative impact assessment to be used for other new, revised or existing land use and activity level plans that involve vegetation modification or maintenance. This EIS does not affect the status of the herbicide court injunction in Oregon.

The analysis area includes only surface estate public lands administered by 11 BLM state offices: Alaska, Arizona, California, Colorado, Idaho, Montana (Dakotas), New Mexico (Oklahoma/Texas/Nebraska), Nevada, Oregon (Washington), Utah and Wyoming.

**SUPPLEMENTARY INFORMATION:** The Draft EIS/EIR addresses facilities-related impacts including the effects of project construction and operation on hydrology, water quality, fish resources, recreation, vegetation and wildlife, visual resources, cultural resources, land use, geology, soils, seismicity, groundwater, traffic and circulation, air quality, noise, and public health and safety. Diversion-related impacts include the effects of increased diversions from the Bay Delta and associated changes in Reclamation's operation of Central Valley Project (CVP) facilities and DWR's operation of State Water Project (SWP) facilities. Project diversions therefore may directly or indirectly affect the Sacramento River, its tributaries, San Joaquin River, its tributaries, and Delta resources including water supply, fish and aquatic habitat, riparian vegetation and habitat, water quality, recreation, visual and cultural resources. The Draft EIS/EIR also evaluates potential growth-inducing impacts for the CVP and SWP water service areas. An evaluation of cumulative hydrologic and water service area impacts associated with reasonably foreseeable actions is also included.
