

EPA is then using the PPM model to evaluate the potential impacts of regulatory options described in the proposed rule. To do this, EPA adjusts the life stage-specific rates of impingement and entrainment mortality to reflect the estimated effectiveness of a given regulatory option. EPA then compares the model's estimates with and without implementation of a given regulatory option to estimate the option's impact on population abundance.

Given the limited number of species populations for which sufficient data is available to implement the PPM model, EPA foresees using the model as a supplement to, rather than as a replacement for, the modeling efforts described in the proposal. Some preliminary results from use of the PPM model are described in Section 4 of DCN 8-5201. EPA has also conducted a peer review of the model.²⁵ EPA solicits comment on the use of the PPM model for the final rule. EPA also solicits submission of data that may be used to implement the model.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[R05-OAR-2005-IN-0007; FRL-7999-4]

Approval and Promulgation of Implementation Plan; Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve Indiana's April 8, 2005, submittal which revises existing sulfur dioxide (SO₂) emission limits for sources in Dearborn County. On April 8, 2005, Indiana submitted its final rule as published in the Indiana Register. Indiana held public hearings on the submittal on May 5, 2004 and October 6, 2004. Indiana is requesting that EPA approve the revisions to Indiana's SO₂ rule for Dearborn County, which removes obsolete rule language and updates information for sources listed in the rule. These revisions will not result in

an increase in SO₂ emissions in Dearborn County because no emission limits were increased.

In the final rules section of this **Federal Register**, EPA is approving the SIP revision as a direct final rule without prior proposal, because EPA views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If we do not receive any adverse comments in response to these direct final and proposed rules, we do not contemplate taking any further action in relation to this proposed rule. If EPA receives adverse comments, we will withdraw the direct final rule and will respond to all public comments in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

III. Where Can I Find More Information About This Proposal and the Corresponding Direct Final Rule?

I. General Information

A. Does This Action Apply to Me?

This action only applies to specific SO₂ sources located in Dearborn County, Indiana.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit CBI to EPA through RME, regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified.

II. What Action Is EPA Taking Today?

EPA is proposing to approve revisions to Indiana's SO₂ SIP for specified existing stationary sources located in Dearborn County, Indiana. The SIP revisions amend 326 IAC 7-4-13, by

removing obsolete rule language for the Indiana Michigan Power Tanners Creek Station. The SIP revision also updates information for other companies listed in 326 IAC 7-4-13, including adding source identification numbers. The amendments to this rule are minor, and will not result in an increase in SO₂ emissions in Dearborn County because no emission limits were increased.

III. Where Can I Find More Information About This Proposal and the Corresponding Direct Final Rule?

For additional information, see the Direct Final Rule which is located in the Rules section of this **Federal Register**. Copies of the request and the EPA's analysis are available electronically at RME or in hard copy at the above address.
