

CBI, or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to <http://www.epa.gov/edocket>.

Title: Willingness to Pay Survey for section 316(b) Phase III Cooling Water Intake Structures: Instrument, Pre-test, and Implementation

Abstract: The U.S. Environmental Protection Agency is in the process of developing new regulations to provide national performance standards for controlling impacts from cooling water intake structures (CWIS) for Phase III facilities under section 316(b) of the Clean Water Act (CWA). Phase III under Clean Water Act section 316(b) regulations applies to facilities that withdraw water for cooling purposes from rivers, streams, lakes, reservoirs, estuaries, oceans, or other waters of the United States, and that are either existing electrical generators with cooling water intake structures that are designed to withdraw 50 million gallons of water per day (MGD) or less, or existing manufacturing and industrial facilities. The regulation also establishes section 316(b) requirements for new offshore oil and gas extraction facilities. EPA has previously published final section 316(b) regulations that address new facilities (Phase I) on December 18, 2001 (66 FR 65256) and existing large power producers (Phase II) on July 9, 2004 (69 FR 41576). See 40 CFR part 125, subparts I and J, respectively.

As required under Executive Order 12866, EPA is conducting economic impact and cost-benefit analyses for the section 316(b) regulation for Phase III facilities. Comprehensive, estimates of total resource value include both use and non-use values, such that the resulting total social benefit estimates may be compared to total social cost. Many public comments on the proposed section 316(b) regulation for Phase II facilities and the Phase II Notice of Data Availability suggested that a properly designed and conducted stated preference, or contingent valuation

(CV), survey would be the most appropriate and acceptable method to estimate the non-use benefits of the rule. Stated preference survey methodology is the generally accepted means to estimate non-use values. To assess public policy significance or importance of the ecological gains from the section 316(b) regulation for Phase III facilities, EPA proposes to conduct a stated preference study to measure non-use benefits of reduced fish losses at CWIS due to the regulation.

The survey will ask respondents to choose how they would vote, if presented with two different hypothetical regulatory options characterized by (a) changes in annual impingement and entrainment losses of fish and other organisms, (b) effects on long-term fish populations, (c) effects on recreational and commercial catch, and (d) an unavoidable cost of living increase for the respondent's household. Respondents will be allowed to "vote" for one of the presented regulatory options, or to choose not to vote for either option. The survey will also ask respondents to answer questions about their reasons for voting, their level of concern about various policy issues, and their affiliations and recreational activities.

Survey subjects will be randomly selected from a representative national panel of respondents maintained by Knowledge Networks, an online survey company. Subjects will be asked to complete a web-based questionnaire. Participation in the survey is voluntary. Additionally, EPA will conduct non-response follow-up interviews with 600 individuals, and will use statistical techniques to correct for unobserved heterogeneity in the survey data.

To assist in the development of this stated preference survey, EPA previously obtained approval from the Office of Management and Budget to conduct a series of twelve focus groups with a total of 96 respondents (see EPA ICR number 2155.01, OMB number 2040-0262).

EPA received several comments on the proposed ICR for this survey. Many comments provided specific reasons why the survey might overestimate or underestimate willingness to pay to prevent fish losses. Almost all of these comments have been addressed through the focus groups and cognitive interviews, which have helped the Agency to improve the survey.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40

CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 41 minutes per respondent. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Individuals greater than 18 years of age/ households.

Estimated Number of Respondents: 5,000.

Frequency of Response: Once.

Estimated Total Annual Burden: 3,383 hours.

Estimated Total Annual Cost: \$59,919. EPA estimates that there will be no capital or O&M costs.

Dated: November 16, 2005.

Oscar Morales,

Director, Collection Strategies Division.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[OECA-2005-0017; FRL-8002-7]

Agency Information Collection Activities; Submission for OMB Review and Approval; Comment Request; NSPS for Bulk Gasoline Terminals (Renewal); EPA ICR Number 0664.08; OMB Control Number 2060-0006

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act, this document announces that an Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval. This is a request to renew an existing approved

collection. This ICR is scheduled to expire on December 31, 2005. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost.

DATES: Additional comments may be submitted on or before December 28, 2005.

ADDRESSES: Submit your comments, referencing docket ID number OECA-2005-0017, to (1) EPA online using EDOCKET (our preferred method), by e-mail to docket.oeca@epa.gov, or by mail to: EPA Docket Center (EPA/DC), Environmental Protection Agency, Enforcement and Compliance Docket and Information Center, Mail Code 2201T, 1200 Pennsylvania Ave., NW., Washington, DC 20460, and (2) OMB at: Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Maria Malavé, Compliance Assessment and Media Programs Division, Mail Code 2223A, Office of Compliance, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: (202) 564-7027; fax number: (202) 564-0050; e-mail address: malave.maria@epa.gov.

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On May 6, 2005 (70 FR 24020), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments.

EPA has established a public docket for this ICR under Docket ID Number OECA-2005-0017, which is available for public viewing at the Enforcement and Compliance Docket and Information Center in the EPA Docket Center (EPA/DC), EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket and Information Center Docket is: (202) 566-1752. An electronic version of the public docket is available through EPA Dockets (EDOCKET) at <http://www.epa.gov/edocket>. Use EDOCKET to submit or view public comments, access the index listing of the contents of the public docket, and to

access those documents in the public docket that are available electronically. When in the system, select "search", then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDOCKET as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to www.epa.gov/edocket.

Title: NSPS for Bulk Gasoline Terminals (Renewal).

Abstract: The New Source Performance Standards (NSPS) were proposed on December 17, 1980 and promulgated on August 18, 1983, and amended on December 22, 1983. These standards apply to the total of all loading racks at bulk gasoline terminals that deliver liquid product into gasoline tank trucks and for which construction, modification or reconstruction commenced after the date of proposal. A bulk gasoline terminal is any gasoline facility that receives gasoline by pipeline, ship or barge, and has a gasoline throughput greater than 75,700 liters per day. The affected facility includes the loading arms, pumps, meters, shutoff valves, relief valves, and other piping and valves necessary to fill delivery tank trucks. Volatile organic chemicals (VOCs) are the pollutants regulated under this subpart.

Owners or operators of the affected facilities described must make the following one-time-only reports: notification of the date of construction or reconstruction; notification of the anticipated and actual dates of startup; notification of any physical or operational change to an existing facility that may increase the regulated

pollutant emission rate; notification of the date of the initial performance test; and the results of the initial performance test. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports and records are required, in general, of all sources subject to NSPS.

Monitoring requirements specific to bulk gasoline terminals are listed in 40 CFR 60.505. These requirements consist of identifying and documenting vapor tightness for each gasoline tank truck that is loaded at the affected facility, and notifying the owner or operator of each tank truck that is not vapor-tight. The owner or operator must also perform a monthly visual inspection for liquid or vapor leaks, and maintain records of these inspections at the facility.

This information is being collected to assure compliance with 40 CFR part 60, subpart XX. Any owner or operator subject to the provisions of this part will maintain a file of these records, and retain the file for at least two years following the date of such records. The reporting requirements for this industry currently include only the initial notifications and initial performance test report listed above. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 329 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to adjust the existing ways to comply with any previously applicable instructions and requirements; to train personnel to be

able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information.

Respondents/Affected Entities: Bulk gasoline terminals with affected facilities including loading arms, pumps, meters, shutoff valves, relief valves, and other piping.

Estimated Number of Respondents: 40.

Frequency of Response: Initially and on occasion.

Estimated Total Annual Hour Burden: 3,168 hours.

Estimated Total Annual Costs: \$1,062,809, which includes \$0 annualized Capital expense/Startup costs, \$0 annual Operation and Maintenance costs, and \$1,062,809 Respondent Labor costs per year.

Changes in the Estimates: There is an increase of 1,748 hours in the total estimated industry burden currently identified in the OMB Inventory of Approved ICR Burdens.

This increase in labor burden is due to a correction of the frequency of recording leak detection inspection data from one occurrence per year to monthly occurrences as required by the rule and the inclusion of labor hours for the management and clerical employees. The total industry cost also increased from \$631,983 to \$1,062,809 as a result of these changes and the use of an updated technical labor rate.

Dated: November 17, 2005.

ENVIRONMENTAL PROTECTION AGENCY

[OAR-2003-0034; FRL-8002-6]

Agency Information Collection Activities; Submission to OMB for Review and Approval; Comment Request; Reporting Requirements Under EPA's Voluntary Aluminum Industrial Partnership (VAIP) (Renewal), EPA ICR Number 1867.03, OMB Control Number 2060-0411

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that an Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for

review and approval. This is a request to renew an existing approved collection. This ICR is scheduled to expire on December 31, 2005. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost.

DATES: Additional comments may be submitted on or before December 28, 2005.

ADDRESSES: Submit your comments, referencing docket ID number OAR-2003-0034, to (1) EPA online using EDOCKET (our preferred method), by e-mail to a-and-r-Docket@epa.gov, or by mail to: Environmental Protection Agency, EPA Docket Center (EPA/DC), Air and Radiation Docket and Information Center, 6102T, 1200 Pennsylvania Avenue, NW., Washington, DC 20460, and (2) OMB at: Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Sally Rand, Office of Atmospheric Programs, 6207J, Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; telephone number: 202-343-9739; fax number: 202-343-2208; e-mail address: rand.sally@epa.gov.

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On August 25, 2005 (70 FR 49920), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments.

EPA has established a public docket for this ICR under Docket ID No. OAR-2003-0034, which is available for public viewing at the Air and Radiation Docket and Information Center in the EPA Docket Center (EPA/DC), EPA West, Room B102, 1301 Constitution Avenue, NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Air and Radiation Docket is (202) 566-1742. An electronic version of the public docket is available through EPA Dockets (EDOCKET) at <http://www.epa.gov/edocket>. Use EDOCKET to submit or view public comments, access the index listing of the contents of the public docket, and to access those documents

in the public docket that are available electronically. Once in the system, select "search," then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDOCKET as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 FR 38102 (May 31, 2002), or go to www.epa.gov/edocket.

Title: Reporting Requirements Under EPA's Voluntary Aluminum Industrial Partnership (VAIP) (Renewal).

Abstract: EPA's Voluntary Aluminum Industrial Partnership (VAIP) was initiated in 1995 and is an important voluntary program contributing to the overall reduction in emissions of greenhouse gases. This program focuses on reducing direct greenhouse gas emissions including perfluorocarbon (PFC) and carbon dioxide (CO₂) emissions from the production of primary aluminum. Seven of the eight U.S. producers of primary aluminum participate in this program. PFCs are very potent greenhouse gases with global warming potentials several thousand times that of carbon dioxide and they persist in the atmosphere for thousands of years. CO₂ is emitted from consumption of the carbon anode. EPA has developed this ICR to renew authorization to collect information from companies in the VAIP. Participants voluntarily agree to the following: Designating a VAIP liaison; undertaking technically feasible and cost-effective actions to reduce PFC and direct CO₂ emissions; and reporting to EPA, on an annual basis, the PFC and CO₂ emissions or production parameters use to estimate emissions. The information contained in the annual
