

would provide additional controlled airspace to accommodate the new ILS SIAP at Wenatchee/Pangborn Memorial Airport, Wenatchee, WA. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9M dated August 30, 2004, and effective September 16, 2004, which is incorporated by reference in 14 CFR part 71.1. The Class E airspace designations listed in this document will be published subsequently in that order.

The Rule

This amendment to 14 CFR part 71 revises Class E airspace at Wenatchee, WA, by providing additional controlled airspace for aircraft executing the new ILS SIAP at the Wenatchee/Pangborn Memorial Airport. This additional controlled airspace extending upward from 700 feet or more above the surface is necessary for the containment and safety of IFR aircraft executing this SIAP and transitioning to/from the en route environment.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep the regulations current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Steel Import Monitoring and Analysis System

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: The Department of Commerce publishes this action to make final an interim final rule that extended and expanded the Steel Import Monitoring and Analysis (SIMA) system until March 21, 2009. This action also expands the list of covered items to include all basic steel mill products, but it also removes certain downstream steel products, which were formerly covered products (certain fittings and flanges, certain cold formed shapes, and certain bars). The purpose of the SIMA system is to provide statistical data on steel imports entering the United States seven weeks earlier than is otherwise publicly available. The data collected on the licenses are made available to the public in an aggregated form weekly after Commerce review.

DATES: This final rule is effective December 5, 2005.

FOR FURTHER INFORMATION CONTACT: For information on the SIMA system, please contact Kelly Parkhill (202) 482-3791; Julie Al-Saadawi (202) 482-1930.

SUPPLEMENTARY INFORMATION: The SIMA system (formerly referred to as Steel

Monitoring and Analysis system) was originally outlined in the President's March 5, 2002, Proclamation about Steel Safeguards, which also placed tariffs temporarily on many steel imports and provided the steel industry time to restructure. The monitoring system outlined in the President's Proclamation required all importers of steel products to obtain a license from the Department of Commerce prior to completing their Customs import summary documentation. The original intent was to provide a monitoring tool to ensure that the effectiveness of the safeguard was not undermined by large quantities of imports originating from countries that were excluded from the tariffs. On December 4, 2003, the President issued a proclamation that terminated the steel safeguard measures, but directed the Secretary of Commerce to continue the monitoring system until the earlier of March 21, 2005, or such time as the Secretary of Commerce establishes a replacement program. On December 9, 2003, the Department of Commerce published a notice stating that the system would continue in effect as described in the Proclamation until March 21, 2005 (68 FR 68594).

On August 25, 2004, the Department published an advanced notice of proposed rulemaking soliciting comments from the public on whether to continue the monitoring system beyond March 21, 2005 (69 FR 52211) and, if extended, whether the system should be modified in any way. The Department received a number of submissions from a wide range of interested parties, including steel producers, steel consumers, steel suppliers, and importers as well as Congressional and foreign interests. On March 11, 2005, the Department published an interim final rule responding to these comments from the public and implementing a slightly expanded version of SIMA until March 21, 2009. The Department received forty-two submissions from a wide range of interested parties. Please refer to the SIMA system's Web site to read the comments on the Interim Rule and for further information about the SIMA system: <http://ia.ita.doc.gov/steel/license/>.

Final Rule

The purpose of the SIMA system is to collect timely detailed statistics on steel imports and to provide stakeholders with information about import trends in this sector. The SIMA system aggregates detailed import statistics it collects from internet-generated licenses and makes the data available for public analysis on a weekly basis. The data gathering
