SUPPLEMENTARY INFORMATION: The workshop is being held in response to the interest in the topics discussed from small medical device manufacturers in the Dallas District area. This is also consistent with the purposes of FDA's Regional Small Business Program, which are, in part, to respond to industry inquiries, develop educational materials, and sponsor workshops and conferences to provide firms, particularly small businesses, with firsthand working knowledge of FDA's requirements and compliance policies. This workshop is also consistent with the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104-121), as an outreach activity by Government agencies to small businesses.

The goal of the workshop is to present information that will enable manufacturers and regulated industry to better comply with the medical device QSR. The following topics will be discussed at the workshop: (1) Overview of the International Organization for Standardization (ISO) standard EN 14971, and residual risk, (2) incorporating risk management throughout the product lifecycle, (3) overview of a closed-loop corrective and preventive action (CAPA) system, (4) CAPA effectiveness, (5) overview of a training program, and (6) training program effectiveness.
