

Use of Results

TSA will use the results of the biographic and biometric data collection to verify an applicant's claimed identity and to perform a security threat assessment on the individual volunteering for the program and check immigration status to ensure eligibility for the program. The security threat assessment is essential for TSA to determine whether the applicant presents, or is suspected of presenting, a threat to transportation security. Individuals who do not pose, or are not suspected of posing, a threat to transportation security, and otherwise meet all other eligibility requirements for the RT program, will be afforded enhanced benefits at the TSA security checkpoints.

TSA Headquarters personnel and individual service providers, air carriers, and airports will use the results of the surveys and interviews to evaluate and improve customer service and operational efficiency of this program.

Comments Invited

In accordance with the Paperwork Reduction Act of 1995, (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to a collection of information, unless it displays a valid OMB control number. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Information Collection Requirement

1652-0006; *Employment Standards, 49 CFR Parts 1542 and 1544.* The Aviation and Transportation Security Act of 2001 (Pub. L. 107-71, 115 Stat. 597, Nov. 19, 2001), transferred the responsibility for civil aviation security, including the prescribing of employment standards as outlined above, from the Federal Aviation Administration (FAA) to TSA. In February 2002, TSA implemented its employment standards at 49 CFR parts 1542 and 1544, while the FAA 14 CFR parts 107 and 108 were repealed. Airport operators maintain records of compliance with part 1542 for those employees with access privileges to secure areas of the airport. Air carrier operators maintain records of compliance with part 1544 for selected crew and security employees. TSA civil aviation security inspectors review these records to ensure that the safety and security of the public is not compromised. TSA estimates the annual burden hours to be 130,005.
