

A. Western reserves the right to reduce the withdrawable portion of a contractor's contract rate of delivery, upon a 2-year notice of a request by Reclamation for additional priority use power needed to serve project pumping requirements or irrigation pumping on certain Indian lands.

B. Western, at its discretion and sole determination, reserves the right to adjust the contract rate of delivery on 5 years' written notice in response to changes in hydrology and river operations. Such adjustments will only take place after Western conducts a public process.

C. Each applicant is ultimately responsible for arranging third-party delivery. Western may assist new applicants, upon request, in facilitating third-party transmission and/or displacement arrangements for delivery of firm power allocated under these contracts.

D. The Contractor shall not sell any of the firm electric power or energy allocation to any electric utility customer of the Contractor for resale by that utility customer. The Contractor may sell the electric power and energy allocation to its members on condition that said members not sell any of said power and energy to any customer of the members for resale by that customer.

E. Contracts entered into under the Post-2008 Resource Pool Allocation Procedures will provide for Western to furnish firm electric service effective from October 1, 2008, through September 30, 2028.

F. Contractors will be required to pay 1 month in advance for firm electric service. If both parties mutually agree, payments of more than 1 month in advance may be allowed.

G. To the extent existing contractors' power allocations are reduced to create the resource pool, new contractors will be required to reimburse existing contractors for undepreciated replacement advances.

H. Applicants that aggregate their loads will be required to enter into a single firm power contract with Western, with the aggregated group entity as the contracting Party.

I. Contracts entered into as a result of these final procedures will incorporate Western's standard provisions for power sales contracts, including integrated resource planning, and the General Power Contract Provisions.

VI. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601, *et seq.*) requires Federal agencies to perform a regulatory flexibility analysis if a final rule is likely

to have a significant economic impact on a substantial number of small entities and there is a legal requirement to issue a general notice of proposed rulemaking. Western has determined that this action does not require a regulatory flexibility analysis since it is a rulemaking of particular applicability involving rates or services applicable to public property.

VII. Small Business Regulatory Enforcement Fairness Act

Western has determined this rule is exempt from congressional notification requirements under 5 U.S.C. 801 because the action is a rulemaking of particular applicability relating to rates or services and involves matters of procedure.

VIII. Determination Under Executive Order 12866

Western has an exemption from centralized regulatory review under Executive Order 12866; accordingly, no clearance of this notice by the Office of Management and Budget is required.

IX. Environmental Compliance

Western has completed an environmental impact statement on EPAMP, following the National Environmental Policy Act of 1969 (NEPA). The Record of Decision was published in 60 FR 53181, October 12, 1995. Western's NEPA review assured all environmental effects related to these actions have been analyzed.

Dated: December 1, 2005.
