# The Proposal

The FAA is considering an amendment to the Code of Federal Regulations (14 CFR part 71), which would revise the Class E airspace at Sand Point, AK. The intended effect of this proposal is to modify Class E airspace upward from 700 ft. and 1,200 ft. above the surface to contain Instrument Flight Rules (IFR) operations at Sand Point, AK.

The FAA Instrument Flight Procedures Production and Maintenance Branch has developed three new SIAPs, revised the DP, and modified one SIAP for the Sand Point Airport. The new approaches are: (1) Area Navigation (Global Positioning System) (RNAV (GPS)) Runway (RWY) 13, original; (2) Non-directional Beacon (NDB)/Distance Measuring Equipment (DME) RWY 13, original; (3) NDB/DME RWY 31, original. The unnamed revised DP is published in the front of the U.S. Terminal Procedures Alaska Vol 1. The revised SIAP is the NDB RWY 13, Amendment 1. Modified Class E controlled airspace extending upward from 700 ft. and 1,200 ft. above the surface within the Sand Point Airport area would be established by this action. The proposed airspace is sufficient to contain aircraft executing the new and revised instrument procedures at the Sand Point Airport.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 in FAA Order 7400.9N, Airspace Designations and Reporting Points, dated September 1, 2005, and effective September 15, 2005, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February

26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart 1, section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it proposes to modify the Class E airspace sufficiently to contain aircraft executing instrument procedures at Sand Point Airport and represents the FAA's continuing effort to safely and efficiently use the navigable airspace.

# The Proposed Amendment

# §71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9N, Airspace Designations and Reporting Points, dated September 1, 2005, and effective September 15, 2005, is to be amended as follows: Paragraph 6005 Class E airspace extending upward from 700 feet or more above the surface of the earth.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Advance notice of proposed rulemaking; second extension of the comment period.

**SUMMARY:** The EPA is extending the comment period a second time for an advanced notice of proposed rulemaking (ANPR) published on August 31, 2005 (70 FR 51694).
