NUCLEAR REGULATORY COMMISSION

Availability of and Solicitation of Public Comments on Report on Seismic Considerations for the Transition Break Size

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of opportunity for public comment.

SUMMARY: On November 7, 2005, the Nuclear Regulatory Commission (NRC) published for public comment a proposed rule in the **Federal Register** (70 FR 67598) on Risk-Informed Changes to Loss-of-Coolant Accident Technical Requirements. Under the proposed § 50.46a rule, nuclear power plant licensees would be allowed to implement a voluntary, risk-informed alternative to the current requirements for analyzing the performance of emergency core cooling systems (ECCS) during loss-of-coolant accidents (LOCAs). In addition, the proposed rule would establish procedures and criteria for requesting changes in plant design and procedures based upon the results of the new analyses of ECCS performance during LOCAs. In the **Federal Register** notice associated with the publication of the proposed alternative § 50.46a rule, the Commission noted that the potential for seismically-induced pipe breaks was not considered in determining the area of the transition break sizes¹ (TBSs). The Commission stated that work was ongoing to investigate the possible effect of seismically-induced pipe breaks on the TBS selections and committed to put a report on the NRC Web site to facilitate public comment on the technical aspects of the issue. The NRC staff has completed its report and has posted it on the Rulemaking Forum Web site, <http://ruleforum.llnl.gov>.

DATES: Comment period expires on February 6, 2006. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given to comments received after this date.

¹ Different values for TBS were specified for PWRs and BWRs.

Regulation Blackout Trade Restriction ("Regulation BTR") clarifies the scope and application of Section 306(a) of the Sarbanes-Oxley Act of 2002 ("Act"). The information provided under Regulation BTR is mandatory and is available to the public. Approximately 1,230 issuers file Regulation BTR notices annually. We estimate that it takes 2 hours per response for an issuer to draft a notice to directors and executive officers for a total annual burden of 2,460 hours. The issuer prepares 75% of the 2,460 annual burden hours for a total reporting
