

Title: Reporting and Recordkeeping Requirements of the HCFC Allowance System.

ICR numbers: EPA ICR No. 2014.03, OMB Control No. 2060-0498.

ICR status: This ICR is currently scheduled to expire on June 30, 2006. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and included on the related collection instrument or form, if applicable.

Abstract: In order to continue to meet its obligations under the Montreal Protocol on Substances that Deplete the Ozone Layer (Protocol) and the Clean Air Act Amendments of 1990 (CAAA), EPA maintains an allowance system for class II controlled substances or hydrochlorofluorocarbons (HCFCs). Under the Protocol, the U.S. is obligated to limit HCFC consumption (defined by the Protocol as production plus imports, minus exports) under a specific cap. The U.S. is also a signatory to amendments that froze HCFC production on January 1, 2004. EPA is controlling U.S. production and import of HCFCs by granting baseline allowances based on the historical activity levels of producers and importers. Since each allowance will be equal to 1 kilogram of HCFC, EPA will be able to monitor the quantity of HCFCs being produced, imported, exported, transformed, or destroyed. There are two types of allowances: Consumption allowances and production allowances. Transfers of production and consumption allowances among producers and importers are allowed. Producers, importers, and exporters are required to submit to EPA quarterly reports of the quantity of HCFCs in each of their transactions; they are also required to report the quantity of HCFCs transformed or destroyed. EPA requires all producers, importers, and exporters maintain records such as Customs entry forms, bills of lading, sales records, and canceled checks to support their quarterly reports. The quarterly reports may be faxed or mailed to EPA and soon may be submitted electronically, where they are handled as confidential business information. EPA stores the submitted information in a computerized database designed to track allowance balances and transfer activities. When electronic reporting is available, EPA will change its guidance document and revise the ICR if there is

any change in burden hours. EPA uses collected information to ensure that the U.S. maintains compliance with the Protocol caps, to report annually to the United Nations Environment Programme the U.S. activity in HCFCs, and to ensure that allowance holders are in compliance. The respondents are producers, importers, and exporters of HCFCs; and entities granted HCFC-141b exemption allowances.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is currently estimated to average less than one hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 52.

Frequency of response: quarterly, annual, or one-time only.

Estimated total average number of responses for each respondent: 114.

Estimated total annual burden hours: 3,292 hours for respondents.

Estimated total annual costs: \$472,197 for respondents. This includes the current OMB-approved estimated burden cost of \$253,089 and an estimated cost of \$219,108 for capital investment or maintenance and operational costs. There is no change of hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received, historical information with complying with the requirements of this ICR, and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another

Federal Register notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
