

Additionally, FAA determined that procedural actions recommended in the Airport's 14 CFR Part 150 Noise Compatibility Program would conflict with existing airspace utilization. Both proposed projects were therefore removed from evaluation in the EIS. The preliminary lack of adverse impacts from the remaining projects indicates that a DEIS is no longer required under the National Environmental Policy Act.

The public will be given the opportunity to review the DEA during the 30-day public comment period. Prior to the close of the comment period, any person may make a written request for a public meeting, setting forth the particular reasons for the request. The FAA will then determine whether the issues raised are substantial and should be considered in making their decision. If a public meeting is warranted, all known interested parties will be notified of the time, date, and location of such a meeting in the local news media.
