Dated at Arlington, Texas, this 22nd day of December, 2005.

**I. Introduction**

Pursuant to 10 CFR 2.106, the Nuclear Regulatory Commission (NRC) is providing notice of the issuance of License Amendment 19 to Material License No. 42-23539-01AF to Department of the Air Force, to authorize the release of four OT-10 training sites at Kirtland Air Force Base, Albuquerque, New Mexico for unrestricted use. The Department of the Air Force's request for an amendment to authorize decommissioning of its four OT-10 training sites was previously notice in the **Federal Register** on June 22, 2001 (66 FR 33579) with a notice of an opportunity to request a hearing.

The Department of the Air Force provided a final radiological status survey report to demonstrate the OT-10 site meets the license termination criteria in Subpart E of 10 CFR Part 20. In addition, NRC staff conducted independent radiological measurements of soils and surfaces at the site. The NRC staff has evaluated the Department of the Air Force's request, reviewed the results of the final radiological survey, and determined that the four OT-10 training sites: TS5, TS6, TS7, and TS8, including building 28010 but excluding building 28005, meet the unrestricted use dose criteria in 10 CFR 20.1402. The Commission has concluded that the

respective OT-10 training sites as specified, are suitable for release for unrestricted use.

This license amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended, and NRC's rules and regulations set forth in 10 CFR Chapter 1. Accordingly, this license amendment was issued on December 12, 2005, and is effective immediately.

**II. Further Information**

The NRC has prepared a Final Safety Evaluation Report (SER), December 2005, which documents the information that was reviewed and NRC's conclusion. In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," details with respect to this action, including the SER and accompanying documentation included in the license amendment package, are available electronically at the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html>. From this site, you may access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. The ADAMS accession numbers for the documents related to this notice are as follows.

For the Nuclear Regulatory Commission.

**NUCLEAR REGULATORY COMMISSION**

[Docket Nos. 50-317 and 50-318]

**Calvert Cliffs Nuclear Power Plant, Inc.; Notice of Withdrawal of Application for Amendment to Facility Operating License**

The U.S. Nuclear Regulatory Commission (NRC or the Commission) has granted the request of Calvert Cliffs

Nuclear Power Plant, Inc. (the licensee) to withdraw its application dated October 14, 2003, for a proposed amendment to Renewed Facility Operating License Nos. DPR-53 and DPR-69 for Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, respectively, located in Calvert County, Maryland.

The proposed amendment would have revised the Technical Specifications to change the frequency of surveillance testing for some engineered safety features components.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on November 25, 2003 (68 FR 66133). However, by letter dated December 19, 2005, the licensee withdrew the proposed change.
