CAROLINA;

RR272-00207 STATE OF
TENNESSEE.

We note that six of the claimants listed above were not listed in our September 30 notice. Thus, while the general public, including these six claimants, has been given notice and an opportunity to comment on our proposal to withhold payment on claims currently being challenged in court, these six claimants were not put on notice that this decision would directly and adversely impact them. Thus, each of these claimants should be given an opportunity to show that, in fact, its claim should not be included in the list—*i.e.*, is not among those currently being challenged in pending litigation. If such a showing is made by any of the six claimants within 30 days of the date of this notice, we will not delay the distribution of a refund to that claimant. In any event, upon the conclusion of any of the litigation challenging particular refund claims, if our refund award is upheld we will promptly order the disbursement of refunds to the affected claimant(s).

It is imperative that all refund recipients immediately inform OHA in the event of any change of payment address or bank account deposit information. DOE will not attempt to locate payees of returned refund payments, and the associated funds will be divided equally between the States and the Federal Government.

Issued in Washington, DC, on January 6, 2005.

George B. Breznay,

Director, Office of Hearings and Appeals.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

[Case No. RF-006]

Energy Conservation Program for Consumer Products: Publication of the Petition for Waiver of Liebherr Hausgeräte From the DOE Refrigerator and Refrigerator-Freezer Test Procedure

AGENCY: Office of Energy Efficiency and
Renewable Energy, Department of
Energy.

ACTION: Notice of petition for waiver and
solicitation of comments.

SUMMARY: Today's notice publishes a
petition for waiver for Liebherr
Hausgeräte (Liebherr). The Liebherr
petition requests a waiver to modify the
refrigerator test procedure for the
Liebherr line of combination wine
storage-freezer products. The
Department of Energy (DOE or
Department) is soliciting comments,
data, and information respecting the
petition for waiver.

DATES: The Department will accept
comments, data, and information not
later than February 13, 2006.

ADDRESSES: DOE will accept comments
on this petition, identified by case
number RF-006, and submitted by any
of the following methods:

- *Mail:* Ms. Brenda Edwards-Jones,
U.S. Department of Energy, Building
Technologies Program, Mailstop EE-2J,
1000 Independence Avenue, SW.,
Washington, DC, 20585-0121.
- *Telephone:* (202) 586-2945. Please
submit one signed paper original.
- *Hand Delivery/Courier:* Ms. Brenda
Edwards-Jones, U.S. Department of
Energy, Building Technologies Program,
Room 1J-018, 1000 Independence
Avenue, SW., Washington, DC 20585.

Docket: For access to the docket to read
copies of public comments received,
this notice, and the petition for waiver,
go to the U.S. Department of Energy,
Forrestal Building, Room 1J-018
(Resource Room of the Building
Technologies Program), 1000
Independence Avenue, SW.,
Washington, DC, (202) 586-9127,
between 9 a.m. and 4 p.m., Monday
through Friday, except Federal holidays.
Please call Ms. Brenda Edwards-Jones at
the above telephone number for
additional information regarding
visiting the Resource Room. Please note:
The Department's Freedom of
Information Reading Room (formerly
Room 1E-190 at the Forrestal Building)
is no longer housing rulemaking
materials.

FOR FURTHER INFORMATION CONTACT: Dr.
Michael G. Raymond, U.S. Department
of Energy, Building Technologies
Program, Mail Stop EE-2J, Forrestal
Building, 1000 Independence Avenue,
SW., Washington, DC 20585-0121, (202)
586-9611; e-mail:
Michael.Raymond@ee.doe.gov; or
Francine Pinto, Esq., or Thomas
DePriest, Esq., U.S. Department of
Energy, Office of General Counsel, Mail
Stop GC-72, Forrestal Building, 1000
Independence Avenue, SW.,
Washington, DC 20585-0103, (202) 586-
9507; e-mail:
Francine.Pinto@hq.doe.gov, or
Thomas.DePriest@hq.doe.gov.

SUPPLEMENTARY INFORMATION: Title III of
the Energy Policy and Conservation Act
(EPCA) sets forth a variety of provisions
concerning energy efficiency. Part B of
Title III (42 U.S.C. 6291-6309) provides
for the "Energy Conservation Program
For Consumer Products Other Than
Automobiles" which requires, among
other things, that DOE prescribe
standardized test procedures to measure
the energy consumption of certain
consumer products, including
refrigerators and refrigerator-freezers.
The relevant DOE test procedure for
purposes of today's decision and order
is "Uniform Test Method for Measuring
the Energy Consumption of Electric
Refrigerators and Electric Refrigerator-
freezers" (current test procedure). The
current test procedure is set forth in 10
CFR part 430, subpart B, Appendix A1.
It prescribes a method for characterizing
the energy requirements of all types of
refrigerators and refrigerator-freezers
and yields model-specific energy
efficiency information that can aid
consumers in their purchasing
decisions.

The Department's regulations contain
provisions allowing a person to seek a
waiver from the test procedure
requirements for covered consumer
products. These provisions are set forth
in 10 CFR 430.27. The waiver
provisions allow the Assistant Secretary
for Energy Efficiency and Renewable
Energy (Assistant Secretary) to waive
temporarily the test procedure for a
particular basic model when a petitioner
shows that the basic model contains one
or more design characteristics that
prevent testing according to the
prescribed test procedures, or when the
prescribed test procedures may evaluate
the basic model in a manner so
unrepresentative of its true energy
consumption as to provide materially
inaccurate comparative data. (10 CFR
430.27(a)(1)) Waivers generally remain
in effect until final test procedure
amendments become effective, thereby

resolving the problem that is the subject of the waiver. (10 CFR 430.27(m))

On July 5, 2005, Liebherr filed a petition for waiver regarding the DOE refrigerator and refrigerator-freezer test procedures. Liebherr's petition seeks a waiver from the DOE test procedure because, Liebherr asserts, its line of combination wine storage-freezers are not accurately categorized by any of the current DOE classes. Liebherr has submitted a modified test procedure to be used for rating its combination wine storage-freezers. Liebherr proposes to calculate the energy consumption of these products by using the current test procedure outlined in 10 CFR Part 430, Subpart B, Appendix A1 for refrigerator/freezers with the following exception. The current methodology outlined in Appendix A1 states that the unit's energy consumption is to be based on either the freezer compartment temperature or the refrigerator compartment temperature. However, the units produced by Liebherr do not include a refrigerator compartment, but do include a section solely dedicated for the purpose of wine storage, which is not convertible so that it may be used for any other purpose; therefore, Liebherr asserts, it is inappropriate to measure the energy consumption of these units in accordance with the refrigerator-freezer test procedure. Liebherr proposes to combine portions of the refrigerator-freezer test procedure with portions of the AHAM household wine chiller energy test procedure.

The Department is publishing Liebherr's petition for waiver in its entirety. The petition contains no confidential information. The Department solicits comments, data, and information with respect to the petition. Any person submitting written comments must also send a copy of such comments to the petitioner. 10 CFR 430.27(b)(1)(iv).

Issued in Washington, DC, on January 6, 2006.

Douglas L. Faulkner,

Acting Assistant Secretary, Energy Efficiency and Renewable Energy.

July 5th, 2005

Mr. Michael G. Raymond, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Mail Station EE-41, Forrestal Building, 1000 Independence Avenue, SW., Washington DC 20585-0121.

Petition by Liebherr Hausgeräte for a Waiver. Energy Conservation Standards in 10 CFR Part 430, for the Liebherr Wine/ freezer Models "WF 1051" and "WFI 1051"

1. Description of Applicant

Liebherr Hausgeräte is part of the Liebherr Group, an international group with a workforce of over 21,000 employees and

more than 80 companies worldwide, including the United States of America.

Further information can be found at <http://www.liebherr.com>.

Liebherr Hausgeräte has specialized in the manufacture of high quality refrigerators, freezers and wine storage appliances. It is headquartered in Ochsenhausen, Germany. The marketing of Liebherr products in the U.S. started in the 2nd quarter of 2004. Right now, Liebherr Hausgeräte is only manufacturing under the Liebherr brand name for products sold in the United States.

2. Background and General Information

Liebherr is requesting relief for a product which consists of a combination of a wine storage compartment on top and freezer compartment on the bottom, Liebherr models WF 1051 and WFI 1051.

Liebherr understands that DOE is not willing to prevent manufacturers of coming to the market with new innovative products which will enhance consumers well being and satisfaction. The market for wine storage has been growing substantially over the last years and is expected to continue growing in the future.

Currently, there is not a current DOE standards for a wine/freezer combination, thus the current evaluation standards would not measure the energy consumption in a representative manner.

3. Petition for a Waiver

On behalf of Liebherr-Hausgeräte GmbH, P.O. Box 1161, 88411 Ochsenhausen, Germany, I wish to submit a petition for a waiver with respect to the Department of Energy, energy efficiency standards under 10 CFR 430.27.

The appliances WF 1051 and WFI 1051 are a combination of a wine storage compartment and a freezer compartment in the bottom. The wine compartment can reach 45° F, which is the ideal drinking temperature for some white wines. But the unit goes as high as 64° F so that we can bring red wines to ideal drinking temperature as well. The wine connoisseurs recommend an average of 55–57° F for long term storage of any kind of wine.

Both models feature wooden wine racks which are not suitable for the storage of fresh food. We also do not offer any optional glass shelves or plastic racks to replace them. So the wine compartment could not be used as a regular refrigerator.

The models WF 1051 and WFI 1051 do not fit into the current standards. To evaluate the models in a representative manner of its true energy consumption characteristics the standard temperature of single wine coolers (55° F) for the wine storage compartment and the standard temperature (5° F) for the freezer compartment should be used. Therefore, the energy consumption is defined by the higher of the two values calculated by the following two formulas (according to 10 CFR part 430, subpart B, Appendix A1):

—Energy consumption of the wine compartment:

$$E_{\text{Wine}} = ET1 + [(ET2-ET1) \times (55^\circ \text{F} - TW1) / (TW2-TW1)]$$

—Energy consumption of the freezer:

$$E_{\text{Freezer}} = ET1 + [(ET2-ET1) \times (5^\circ \text{F} - TF1) / (TF2-TF1)].$$

The total adjusted volume of the models WF 1051 and WFI 1051 is 11.14 ft³. Using the standard temperature of 55° F for the wine compartment the annual energy use of the models WF 1051 and WFI 1051 is 475 kWh/a. According to current DOE standards, these models are classified as refrigerator-freezer with automatic defrost with bottom-mounted freezer without through-the-door ice service.

Respectfully submitted,

Marc Perez, Liebherr-Canada Ltd., 1015 Sutton Drive, Burlington ON L7L 5Z8, Canada.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL06-24-000]

City of Anaheim, CA; Notice of Filing

January 6, 2006.

Take notice that on December 29, 2005, the City of Anaheim, California (Anaheim) submitted its third annual revision of its Transmission Revenue Balancing Account Adjustment filed on December 7, 2005. Anaheim stated the corrections are reflected in Exhibit ANA-1 and Exhibit ANA-2 as well as in the revised Appendix I.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant and all the parties in this proceeding.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public
