BILLING CODE 4830–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[CGD 13–06–002]

RIN 1625–AA00

Safety Zone: North Portland Harbor Dredging Operations; Portland, OR

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone on the Columbia River, in the vicinity of Hayden Island at North Portland Harbor. The Captain of the Port, Portland, Oregon is taking this action to safeguard individuals and vessels from safety hazards associated with dredging operations. Entry into this safety zone is prohibited unless authorized by the Captain of the Port.

DATES: This rule is effective from January 17, 2005 8 a.m. (PST) through March 15, 2005 at 5 p.m. (PST).

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket [CGD13–06–002] and are available for inspection or copying at U. S. Coast Guard Sector Portland, 6767 North Basin Ave. Portland, Oregon 97217 between 7 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Petty Officer Charity Keuter, c/o Captain of the Port Portland, 6767 N. Basin Ave. Portland, Oregon 97217 at 503–240–9301.

SUPPLEMENTARY INFORMATION:

Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B) and 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for not publishing an NPRM and for making this rule effective less than 30 days after publication in the **Federal Register**. The Coast Guard did not receive notice of this operation until 7 days prior to the

beginning of the operation. The dredging operation will have a floating pipeline that will stretch from Port of Portland Terminal 6 to the lower end of Hayden Island and on to Kelly Point Park. This pipeline will be a hazard to navigation due to location and vessel traffic in the area.

If normal notice and comment procedures were followed, this rule would not become effective until after the dates of the event. For this reason, following normal rulemaking procedures in this case would be impracticable and contrary to the public interest.

Background and Purpose

The Coast Guard is establishing a temporary safety zone regulation to allow for safe dredging operation. This operation is necessary for the improvement of the Port of Portland Terminal 6, since in the coming months a new crane will be brought in to allow the Port to accompany larger vessels and more containers. This safety zone will be in effect during the time of January 17, 2006 to March 15, 2006 while the floating pipeline is in the water. This safety zone will be enforced by representatives of the Captain of the Port, Portland, Oregon. The Captain of the Port may be assisted by other Federal and local agencies.

Discussion of Rule

This rule, for safety concerns, will control individuals and vessel movement in a regulated area surrounding the dredging operation. Due to safety concerns and likely delays, entry into this zone is prohibited unless authorized by the Captain of the Port, Portland or his designated representative. Those boaters transiting between the Columbia River and North Portland Harbor are requested to use the upriver end of Hayden Island. The Captain of the Port may be assisted by other Federal and local agencies.

Regulatory Evaluation

This rule is not a “significant regulatory action” under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not “significant” under the regulatory policies and procedures of the Department of Homeland Security (DHS). The Coast Guard expects the economic impact of this rule to be so minimal that a full regulatory evaluation under the regulatory policies and procedures of the DHS is unnecessary.

This expectation is based on the fact that this rule will be in effect for the minimum time necessary to safely conduct the dredging operation. While this rule is in effect, traffic will be allowed to pass through the zone with the permission of the Captain of the Port or his designated representatives on-scene, if safe to do so and that traffic can be rerouted to another entrance into the Oregon Slough at the upriver end of Hayden Island.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule will affect the following entities, some of which may be small entities: the owners or operators of vessels intending to transit the designated area at the corresponding time as drafted in this rule. This safety zone will not have a significant economic impact on a substantial number of small entities for the following reasons. Traffic will be allowed to pass through the zone at selected times with the permission of the Captain of the Port or his designated representative on scene, if safe to do so and that boaters transiting the Oregon Slough can gain access to it by the upriver end of Hayden Island on the Columbia River. Before the effective period, we will issue maritime advisories widely available to users of the river. Because the impacts of this proposal are expected to be so minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this final rule will not have a significant economic impact on a substantial number of small entities.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement

Fairness Act of 1996 (Pub. L. 104–121), we offered to assist small entities in understanding the rule so that they could better evaluate its effects on them and participate in the rulemaking process. If the rule will affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a “significant energy action” under that order because it is not a “significant regulatory action” under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Commandant Instruction M16475.ID, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (34) (g), of the Instruction, from further environmental documentation. A final “Environmental Analysis Check List” and a final “Categorical Exclusion Determination” will be available in the docket where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 165

Harbors, Marine Safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

■ For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1226, 1231; 46 U.S.C. Chapter 701; 50 U.S.C. 191, 195; 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. A temporary § 165.T13–001 is added to read as follows:

§ 165.T13–001 Safety Zones: Oregon Slough Dredging Operations in the Captain of the Port Portland Zone.

(a) *Safety Zones.* The following area is designated a safety zone

(1) Location: All water of the Columbia River enclosed by the following points: 45°37'53" N 122°44'03" W following the shoreline southwest to 45°38'54" N 122°45'28" W continuing west to 45°39'05" N 122°45'36" W turning north to 45°39'12" N 122°45'28" W then northeast 45°38'58" N 122°45'03" W then east to 45°38'22" N 122°44'37" W then northeast to 45°37'53" N 122°43'58" W south back to the point of origin.

(2) Effective time and date. 7 a.m. on January 17, 2006 to 7 p.m. on March 15, 2006.

(b) *Regulations.* In accordance with the general regulations in section 165.23

of this part, no person or vessel may enter or remain in this zone unless authorized by the Captain of the Port or his designated representative.

Dated: January 17, 2006.

Patrick G. Gerrity,

Captain, U.S. Coast Guard, Captain of the Port, Portland, OR.

BILLING CODE 4910-15-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Region 2 Docket No. EPA-R02-OAR-2004-NJ-0004, FRL-8020-6]

Approval and Promulgation of Implementation Plans; New Jersey Consumer Products Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a revision to the New Jersey State Implementation Plan (SIP) for ozone concerning the control of volatile organic compounds. The SIP revision consists of amendments to Subchapter 24 "Prevention of Air Pollution From Consumer Products" of 7:27 of the New Jersey Administrative Codes, which are needed to meet the shortfall in emissions reduction identified by EPA in New Jersey's 1-hour ozone attainment demonstration SIP. The intended effect of this action is to approve a control strategy required by the Clean Air Act, which will result in emission reductions that will help achieve attainment of the national ambient air quality standard for ozone.

DATES: *Effective Date:* This rule will be effective February 24, 2006.

ADDRESSES: EPA has established a docket for this action under the Federal Docket Management System (FDMS) which replaces the Regional Materials in EDOCKET (RME) docket system. The new FDMS is located at <http://www.regulations.gov> and the docket ID for this action is EPA-R02-OAR-2004-NJ-0004. All documents in the docket are listed in the FDMS index. Publicly available docket materials are available either electronically in FDMS or in hard copy at the Environmental Protection Agency, Region II Office, Air Programs Branch, 290 Broadway, 25th Floor, New York, New York 10007-1866. Copies of the documents relevant to this action are also available for public inspection during normal business hours, by

appointment at the Air and Radiation Docket and Information Center, Environmental Protection Agency, Room B-108, 1301 Constitution Avenue, NW., Washington, DC; and the New Jersey Department of Environmental Protection, Office of Air Quality Management, Bureau of Air Pollution Control, 401 East State Street, CN027, Trenton, New Jersey 08625.

FOR FURTHER INFORMATION CONTACT: Paul Truchan, Air Programs Branch, Environmental Protection Agency, 290 Broadway, 25th Floor, New York, New York 10278, (212) 637-3711.

SUPPLEMENTARY INFORMATION:

I. What Action Is EPA Taking Today?

EPA is approving a revision to New Jersey's ozone State Implementation Plan (SIP) submitted on June 22, 2004. This SIP incorporates adopted rule amendments to Title 7, Chapter 27, Subchapter 24 "Prevention of Air Pollution from Consumer Products" which was adopted on April 7, 2004. Subchapter 24 contains two control programs, consumer products and portable fuel container spillage control. This adoption was published in the New Jersey Register on May 3, 2004 and became effective on June 6, 2004. The Subchapter 24 amendments are applicable to the entire State of New Jersey. The reader is referred to the proposed rulemaking (December 10, 2004, 69 FR 71764) for additional details.

Subchapter 24 contains provisions for accepting innovative products exemptions (IPEs), alternative compliance plans (ACPs), and variances that have been approved by the California Air Resources Board (CARB) or other states with adopted consumer product regulations based on the Ozone Transport Commission (OTC) "Model Rule for Consumer Products" dated November 29, 2001. While the provisions related to IPEs, ACP, and variances pursuant to subchapter 24 are acceptable, each specific application of those provisions cannot be recognized as meeting Federal requirements until it is approved by EPA as a SIP revision.

II. What Comments Were Received and How Has EPA Responded to Them?

EPA received one comment pertaining to the proposal for this action which supported this rulemaking.

III. What Role Does This Rule Play in the Ozone SIP?

When EPA evaluated New Jersey's 1-hour ozone attainment demonstrations, EPA determined that additional emission reductions were needed for the State's two severe nonattainment areas

in order for the State to attain the 1-hour ozone standard with sufficient surety (December 16, 1999, 64 FR 70380). EPA provided that the states in the Ozone Transport Region could achieve these emission reductions through local or regional control programs. New Jersey decided to participate with the other states in the Northeast in an Ozone Transport Commission (OTC) regulatory development effort which developed six model control measures. This rulemaking incorporates two of the OTC model control measures into the New Jersey ozone SIP: Consumer products and portable fuel containers. The emission reductions from these control measures will provide a portion of the additional emission reductions needed to attain the 1-hour ozone standard. The emission reductions from these measures will also help to attain the 8-hour ozone standard.

IV. What Are EPA's Conclusions?

EPA has evaluated the submitted Subchapter 24 submission for consistency with EPA regulations, policy and guidance. Consistent with EPA policy and guidance, EPA is approving the rule submitted as part of the New Jersey SIP with the exception that any specific application of provisions associated with IPEs, ACP, and variances, must be submitted as SIP revisions for EPA approval. This rule will strengthen the SIP by providing for additional VOC reductions. Accordingly, EPA is approving the Subchapter 24 revisions as adopted on April 7, 2004 and effective on June 6, 2004 with the limitation identified above.

V. Statutory and Executive Order Reviews

Statutory and Executive Order Reviews Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose
