forwarded to the Office of Management  
and Budget (OMB) for review and  
approval: Crop Acreage and Yields and  
Water Distribution (Water User Crop  
Census Report [Form 7-332], and Crop  
and Water Data [Form 7-2045]), OMB  
Control Number: 1006-0001. The ICR  
describes the nature of the information  
collection and its expected cost burden.

**DATES:** Your written comments must be  
received on or before March 20, 2006.

**ADDRESSES:** You may send comments  
regarding the burden estimate, or any  
other aspect of the information

collection, including suggestions for  
reducing the burden, to the Desk Officer  
for the Department of the Interior at the

Office of Information and Regulatory  
Affairs, via facsimile to (202) 395-6566  
or e-mail to

**SUPPLEMENTARY INFORMATION:** We are  
currently in the process of collaborating  
with the U.S. Department of Agriculture  
(USDA) to develop a way to utilize  
USDA's existing information  
collection(s) to gather the data required  
for our purposes. However, this  
collaboration effort will not be  
completed before the expiration of the  
crop census forms in this information  
collection. Consequently, this  
information collection is being renewed  
as an interim measure to ensure a means  
exists for collection of the crop data  
necessary to perform our functions. We  
anticipate that the collaboration process  
with the USDA will be complete before  
further renewal of this information  
collection is required.

**Title:** Crop Acreage and Yields and  
Water Distribution.

**Abstract:** The annual crop census is  
taken on certain Reclamation projects  
primarily for use as a tool in  
administering, managing, and  
evaluating various aspects of the Federal  
reclamation program. The census is  
used to assist in the administration of  
repayment and water service contracts,  
which are used to repay the irrigators'  
obligation to the Federal government.  
The census will provide data to

facilitate the required 5-year review of  
ability-to-pay analysis, which is being  
incorporated into new repayment and  
water service contracts. The basis for  
these reviews is an audit by the Office  
of the Inspector General, Department of  
the Interior.

Data from the census are utilized to  
determine class 1 equivalency  
computation; *i.e.*, determining the  
number of acres of class 2 and class 3  
land that are required to be equivalent  
in productivity to class 1 land.

In recent years, the census has  
provided data which are used to  
administer international trade  
agreements, such as the North American  
Free Trade Agreement. Data from the  
census are also used by the Office of the  
Inspector General, Government  
Accountability Office, and the  
Congressional Research Service to  
independently evaluate our program  
and to estimate the impacts of proposed  
legislation. These data are supplied to  
other Federal and State agencies to  
evaluate the program and provide data  
for research.

The required 60-day comment period  
was initiated by a notice published in  
the **Federal Register** on September 19,  
2005 (70 FR 54960, Sept. 19, 2005). No  
comments were received in response to  
the 60-day comment period.

**Frequency:** Annually.

**Respondents:** Irrigators and water user  
entities in the 17 Western states who  
receive irrigation water service from  
Bureau of Reclamation facilities. Also  
included are entities who receive other  
water services, such as municipal and  
industrial water through Bureau of  
Reclamation facilities.

**Estimated Total Number of  
Respondents:** 1,325.

**Estimated Number of Responses per  
Respondent:** 1.0.

**Estimated Total Number of Annual  
Responses:** 1,325.

**Estimated Total Annual Burden on  
Respondents:** 2,075 hours.
