BILLING CODE 5001-06-M

**POSTAL SERVICE****39 CFR Part 111****Bundling Flat-Size and Irregular Parcel  
Mail**

**AGENCY:** Postal Service.

**ACTION:** Final rule.

**SUMMARY:** This final rule requires mailers to use two bands to secure all bundles of presorted flat-size mail and irregular parcels when those bundles are not shrinkwrapped.

**DATES:** *Effective Date:* April 30, 2006.

**FOR FURTHER INFORMATION CONTACT:** Bill Chatfield, 202-268-7278.

**SUPPLEMENTARY INFORMATION:****Background**

We published a proposal in the **Federal Register** (70 FR 66314; November 2, 2005) to require mailers to use at least two bands—one band around the length and one around the width—when only banding is used to secure bundles of flat-size and irregular parcel mailpieces. This requirement eliminates the current option to place only one band around bundles 1-inch thick or less.

Bundle integrity—the ability of bundles to remain intact—is crucial for our new, high-speed Automated Package Processing System (APPS). When bundles break open, we lose the value of mailers' presort, and we must handle individual pieces manually. Manual handling of mailpieces from broken or loose bundles results in delayed delivery and increases our processing costs.

**Comments Received**

We received two comments on our proposal. One commenter said it may be difficult to use two bands and maintain visible address and presort information on the top piece of each bundle. Secure bundles with visible addresses and presort designations are key APPS requirements. Mailers may use clear, smooth strapping or place the address on an unobscured part of the mailpiece (for example, in the center of one of the quadrants on the face of the mailpiece). Mailers may avoid banding altogether by shrinkwrapping bundles.

The commenter also said that the new address visibility requirement should have been published together with the new bundling standards. While we changed the standards for address visibility on October 27, 2005, mailers were given a 6-month grace period to comply. We encourage mailers to meet those standards as soon as possible, but mailers are not required to comply until April 30, 2006. The April 30, 2006, implementation date for the new bundling standards matches the compliance date for address visibility.

The second commenter disagreed that bundles prepared with only banding should be required to have bands around the length and width. The commenter stated that, in some cases,

using two parallel bands around the width of the bundle is sufficient.

The standards that require at least one band around the length and one around the width for most bundles are not new standards and help ensure that bundles maintain their integrity. Mailers may use two parallel bands around the width when it can increase the integrity of the bundle, but these bands must be in addition to a third band around the length. The new standard requiring at least one band around the length and one around the width for all bundles that are not shrinkwrapped will prevent even small bundles from falling apart.

**Effective Date**

Mailers must prepare presort bundles of flat-size mail and irregular parcels according to the new standards beginning April 30, 2006, but we encourage mailers to follow the new standards immediately.

**RIN 2060-AK35**

**Standards of Performance for Stationary Gas Turbines**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Direct final rule; amendments.

**SUMMARY:** EPA is taking direct final action to revise certain portions of the standards of performance for stationary gas turbines. We are taking direct final action to revise the standards to clarify that EPA is not imposing new requirements for turbines constructed after 1977. Owners and operators of existing and new turbines may use monitoring that meets the pre-existing monitoring requirements. In addition, we have described a number of acceptable compliance monitoring options that owners and operators may elect to use for these units. We see making the amendments by direct final rule as non-controversial and anticipate no adverse comments.

**DATES:** The direct final rule amendments are effective on April 25, 2006 without further notice, unless EPA receives adverse comment by March 27, 2006 or a public hearing is requested. If EPA receives such comments, it will

publish a timely withdrawal in the **Federal Register** indicating which provisions are being withdrawn due to adverse comment.

**ADDRESSES:** EPA has established a docket for this action under Docket ID No. EPA-OAR-2002-0053. All documents in the docket are listed on the *www.regulations.gov* Web site. Although listed in the index, some information is not publicly available, *i.e.*, CBI or other information whose disclosure is restricted by statute. This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. If you have questions regarding the applicability of this action to a particular entity, consult the contact person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

*Comments.* EPA is publishing the direct final amendments without prior proposal because we view the amendments as noncontroversial and anticipate no adverse comment. In the "Proposed Rules" section of this **Federal Register**, EPA is publishing a separate document that will serve as the proposal in the event that timely adverse comments are received.

Comments may be submitted using the methods and following the instructions specified in the proposal published in the "Proposed Rules" section of today's **Federal Register**. If EPA receives adverse comment on the amendments, we will publish a timely withdrawal in the **Federal Register** indicating which provisions will become effective and which provisions are being withdrawn
