SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to request a revision of the currently approved Office of Management and Budget (OMB) clearance of the Current Industrial Reports (CIR) for Wave I. The Census Bureau conducts a series of

monthly, quarterly, and annual surveys as part of the Current Industrial Reports (CIR) program. The CIR surveys deal mainly with the quantity and value of shipments of particular products and occasionally with data on production and inventories; unfilled orders, receipts, stocks and consumption; and comparative data on domestic production, exports, and imports of the products they cover. These surveys provide continuing and timely national statistical data on manufacturing. Individual firms, trade associations, and market analysts use the results of these surveys extensively in planning or recommending marketing and legislative strategies.

The CIR program includes both mandatory and voluntary surveys. Typically, the monthly and quarterly surveys are conducted on a voluntary basis and annual collections are mandatory. The collection frequency of individual CIR surveys is determined by the cyclical nature of production, the need for frequent trade monitoring, or the use of data in Government economic indicator series. Some monthly and quarterly CIR surveys have an annual "counterpart" collection. The annual counterpart collects annual data on a mandatory basis from those firms not participating in the more frequent collection.

Due to the large number of surveys in the CIR program, for clearance purposes, the CIR surveys are divided into "waves." One wave is resubmitted for clearance each year. This year the Census Bureau plans to submit mandatory and voluntary surveys of Wave I for clearance. The surveys included in Wave I are:

VOLUNTARY SURVEY

MA311D—Confectionery
MA325F—Paint and Allied Products
MA327C—Refractories
MA331B—Steel Mill Products
MA332Q—Antifriction Bearings

*MQ325B—Fertilizer Materials
*MQ327D—Clay Construction Products
*MQ315B—Socks

*These voluntary surveys have mandatory annual counterparts.

II. Method of Collection

The Census Bureau will use mail out/mail back survey forms to collect data. We ask respondents to return monthly report forms within 10 days, quarterly report forms within 15 days, and annual report forms within 30 days of the

SUPPLEMENTARY INFORMATION:

I. Abstract

The economic census, conducted under authority of Title 13, United States Code (USC), is the primary source of facts about the structure and functioning of the Nation's economy. Economic statistics serve as part of the framework for the national accounts and provide essential information for government, business, and the general public. Economic data are the Census Bureau's primary program commitment during nondecennial census years. The 2007 Economic Census covering the Utilities, Transportation and Warehousing, Finance and Insurance, and Real Estate and Rental and Leasing sectors (as defined by the North American Industry Classification System (NAICS)) will measure the economic activity of more than 1 million establishments. However, approximately 13% of establishments will not be required to file separate

reports because they will be included in consolidated company reports; for explanation see selection procedure for establishments of multi-establishment firms below. The information collected will produce basic statistics by kind of business on the number of establishments, revenue, payroll, and employment. It will also yield a variety of subject statistics, including revenue by product line, and other industry-specific measures. Primary strategies for reducing burden in Census Bureau economic data collections are to increase reporting through standardized questionnaires and broader electronic data collection methods.

II. Method of Collection

Mail Selection Procedures

Establishments in the Utilities, Transportation and Warehousing, Finance and Insurance, and Real Estate and Rental and Leasing sectors of the economic census will be selected from the Census Bureau's Business Register for a mail canvass. To be eligible for selection, an establishment will be required to satisfy the following conditions: (i) It must be classified in one of the Utilities, Transportation and Warehousing, Finance and Insurance, and Real Estate and Rental and Leasing sectors; (ii) it must be an active operating establishment of a multi-establishment firm (*i.e.*, a firm that operates at more than one physical location), or it must be a single-establishment firm with payroll (*i.e.*, a firm operating at only one physical location); and (iii) it must be located in one of the 50 states or the District of Columbia. Mail selection procedures will distinguish the following groups of establishments:

1. Establishments of Multi-Establishment Firms

Selection procedures will assign all eligible establishments of multi-establishment firms to the mail component of the potential respondent universe, except for those in selected industries in utilities, and finance and insurance. In these selected industries, where revenue and certain other operating data are not easily attributable to individual establishments, division- or firm-level organizations are asked to report kind of business, payroll, and employment for several establishments, and other required data at a more aggregate level on a consolidated report form.

We estimate that the 2007 Economic Census mail canvasses for the Utilities, Transportation and Warehousing, Finance and Insurance, and Real Estate
