The nonform information under 43 CFR subpart 3809 authorizes operators and mining claimants to perform surface management activities under the General Mining Law.

Under the General Mining Law, a citizen may enter onto public domain lands that are subject to the law to prospect and explore for valuable mineral deposits. They may do so without seeking the government's permission beforehand. The rights to a deposit of a valuable mineral are granted through the act of discovering the mineral deposit. After making a discovery, a prospector may choose to locate and record a mining claim to protect investments in exploration and to have a secure tenure to discovered valuable mineral deposits. Locating a mining claim is not a prerequisite for conducting operations on the public lands, nor is it even a requirement for carrying out mining operations. BLM uses the regulations at 43 CFR subpart 3809 to govern hardrock mineral exploration and development on the public lands and Federal interests in the lands. The hardrock minerals are subject to the provisions of the 1872 General Mining Law (30 U.S.C. 22, *et seq.*, as amended).

BLM collects nonform information on surface management activities from mining claimants and operators.
