

DEPARTMENT OF HOMELAND SECURITY

[DHS-2005-0055]

Privacy Act of 1974; System of Records**AGENCY:** United States Department of Homeland Security (DHS).**ACTION:** Notice of Privacy Act System of Records.

SUMMARY: This notice addresses the previously established ENFORCE/IDENT Privacy Act system of records. Among other information, ENFORCE/IDENT stores biometric data collected for national security, law enforcement and other mission-related functions of the Department of Homeland Security. The Department proposes to change the categories of individuals from whom biometric information will be obtained in order to cover two new groups: (1) Individuals who apply for any form of automated or other expedited inspection for verifying eligibility to cross the borders into the United States; and (2) individuals who are permitted access to the sterile areas of airports after undergoing screening, including an immigration check, by the Transportation Security Administration. The Department also proposes to change the system manager for this record system.

SUPPLEMENTARY INFORMATION: In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) is publishing a revision in an existing Privacy Act system of records known as Enforcement Operational Immigration Records (ENFORCE/IDENT). The notice

for this system of records was last published in the **Federal Register** on December 12, 2003 (68 FR 69414).

ENFORCE/IDENT is a system of records that existed prior to the creation of DHS. It was part of the systems of records maintained by the Immigration and Naturalization Service when that agency was part of the Department of Justice, and it transferred to DHS with enactment of the Homeland Security Act of 2002, Public Law 107-296, 116 Stat. 2135 (Nov. 25, 2002). Although the system provides biometric identification services for many different types of enforcement operations and biometric screening programs at DHS, management of the system is now the responsibility of the United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Program. The title of the System Manager has been changed in this notice to reflect this responsibility.

Because ENFORCE/IDENT amounts to a legacy system, it maintains functionality beyond the collection of biometric information and many of the categories of records already in the system pertain to law enforcement operations generally. The changes being proposed today, however, are prompted by the proposed collection of biometric data from additional populations. In particular, DHS proposes to add two categories of individuals from whom biometric information will be obtained: (1) Individuals who apply for any form of automated or other expedited inspection for verifying eligibility to cross the borders into the United States; and (2) individuals who are permitted access to the sterile areas of airports and seaports after undergoing screening by the Transportation Security Administration. The screening includes a check of immigration databases for which biometrics will be collected and stored in the IDENT record system.

Addition of the first category is based on the fact that DHS has proposed a consolidation of existing frequent traveler programs to expedite the processing of pre-approved, international, low-risk travelers effectively and efficiently through the border. Participation in the trusted traveler programs is completely voluntary, and the applicants agree to provide personal biographical and biometric data for the purposes of conducting law enforcement based background checks and criminal history checks to determine their "low-risk" status. The biometrics will be stored in ENFORCE/IDENT and will be used to conduct biometric based watchlist checks and to verify identity through biometric matching of an individual

against the biometrics submitted by the individual at a prior encounter.

Addition of the second category of individuals is based on the fact that the ENFORCE/IDENT database will maintain biometrics collected by the Transportation Security Administration, which is conducting immigration status checks for individuals who have unescorted access to the sterile areas of airports and seaports.

In addition to the biometrics collected for these two initiatives, ENFORCE/IDENT will maintain sufficient biographic information to facilitate the identification of the biometric information, and encounter data.

The revisions in this record system will result in additions to the categories of individuals covered by the system, but otherwise there should be no significant change in the system operation. Over time, however, DHS may change the architecture of the ENFORCE/IDENT to more closely align it with operational requirements. Such changes will be documented in privacy impact assessments and in further revisions, as necessary, to this system of records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system change to the Office of Management and Budget and to Congress.
