

some environmental impact analyses will need to proceed with incomplete or unavailable information. When information on the environmental effects of a type of critical physical infrastructure reconstruction is limited by incomplete or unavailable information, FEMA will use the direction in the Council on Environmental Quality regulations at 40 CFR 1502.22.

c. Environmental (including related social, cultural, historic, and economic) Impacts and Incorporation of Other Environmental/Historic Preservation Documentation and Processes

FEMA will post on the internet site prepared for NOMA and use the public outreach described above to provide the projects and associated environmental reviews. This will allow the public and environmental reviewers an opportunity to track all the projects and associated impacts in a given area in NOMA.

FEMA will refer to and incorporate other available environmental and planning documents and data prepared for the NOMA area that provide useful information. The agency also intends to incorporate and utilize, to the extent feasible and practical, the environmental documentation or information prepared or gathered by other agencies before this event and those that will be prepared during the reconstruction and rebuilding efforts in NOMA. Examples of documents incorporated by reference include:

- New Orleans International Airport EIS.
- New Orleans Regional Transit Authority EIS for city's streetcar system.
- East-West Corridor Environmental Impact Study.
- New Orleans Riverfront Redevelopment Master Plan.

FEMA will also document and incorporate its ongoing consultation efforts with other regulatory and environmental agencies including the State Historic Preservation Offices and the Advisory Council on Historic Preservation.

V. Duration of the Emergency

The emergency identified above started at the moment of the Presidential disaster declaration and will continue until critical infrastructure in NOMA that is immediately necessary to protect the health and safety of the public is fully restored. Although the submission of some project applications may be contingent upon the occurrence of an independent event (*i.e.* reconstruction of levees, development of local plans,

etc.), the need for the alternative arrangements would continue to exist so long as the amount of time (from the submission of the application to the date agency action on the application is necessary to allow timely implementation or execution of the action) is limited. FEMA and DHS will review these alternative arrangements with the Council on Environmental Quality on a quarterly basis to assess their effectiveness and longevity.

VI. Documentation

Documentation of the analysis of the proposed actions on grant applications and the potential for significant impacts to the human environment will consist of these alternative arrangements and the evolving website and available documents incorporated by reference, with updates as new information becomes available, and the posting of agency actions (receiving, approving, conditioning, or denying) on critical infrastructure grant applications as well as notices of other actions being taking in the NOMA.
