

respondents will be available for public review at the Ely Field Office during regular business hours 7:30 a.m. to 4:30 p.m., Monday through Friday, except holidays. Individual respondents may request confidentiality. If you wish to withhold your name and address from public review or disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your comments. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or business, will be made available for public inspection in their entirety.

FOR FURTHER INFORMATION CONTACT:

Penny Woods, BLM Nevada State Office, (775) 861-6466. You may also contact Ms Woods to have your name added to the EIS mailing list.

SUPPLEMENTARY INFORMATION: The LCLA Groundwater Development Project is being proposed by the Lincoln County Water District (LCWD) and would be located in southeastern Lincoln County. The proposed project would develop and convey groundwater in the Tule Desert and Clover Valley hydrographic basins to land recently sold by the BLM that is approximately 2 miles north of Mesquite, Nevada. This private land comprises the LCLA development area and consists of approximately 13,000 acres. The volume of water to be transported through the proposed facilities would be approximately 23,824 acre-feet per year. The water would be used to support development in the LCLA development area.

The proposed facilities include approximately 8 groundwater production wells (16 inch diameter) located in the Tule Desert and Clover Valley hydrographic basins, a 23-mile long water transmission pipeline (24 inch diameter), and lateral pipelines (12 inch diameter) to connect the transmission pipeline to the productions wells. The proposed width of the right-of-way for the transmission pipeline would be 30 feet with a temporary width of 60 feet during construction. The proposed width of the right-of-way for the lateral pipelines would be 20 feet with a temporary width of 60 feet during construction. The productions well site rights-of-way would be 100 feet x 100 feet with a temporary construction area of 100 feet x 200 feet. Access roads approximately 12 feet in width would be needed from existing roads in the Tule Desert area to each well site.

The proposed production wells would be located in the well field area authorized for the Toquop Energy Project, which is a 1100 MW gas-fired power plant. The proposed transmission pipeline would follow the same alignment as the approved water pipeline for the power plant. From the power plant, the transmission pipeline would proceed to the LCLA development area.

Electric lines, communication lines, and a natural gas pipeline would be located within the proposed transmission pipeline right-of-way. A pipeline bringing reclaimed water from the LCLA development area to the already authorized Toquop Energy Project site would also be in the proposed right-of-way.

The facilities would be located within and/or across the following public lands north of Mesquite, Nevada:

Mount Diablo Meridian

Tps. 6 to 12 S., Rgs. 69 and 71 E., various sections.

A map of the proposed project is available for viewing at the Bureau of Land Management, Ely Field Office, 702 North Industrial Way, Ely NV 89301.

Dated: March 21, 2006.

Amy Lueders,

Associate State Director, Nevada.

National Park Service

Notice of Proposed National Natural Landmark Designation for the Irvine Ranch Land Reserve, CA

AGENCY: National Park Service, Interior.

ACTION: Notice of proposed National Natural Landmark designation.

SUMMARY: The National Park Service has evaluated and determined that the Irvine Ranch Land Reserve, located forty-five miles south of downtown Los Angeles, in Orange County, California appears to meet the criteria for national significance and proposes to recommend the site for designation as a National Natural Landmark. The public is invited to comment on this recommendation. The proposal will be considered by the National Park System Advisory Board at a meeting to be held on June 8, 2006 at Zion National Park, in the Majestic View Lodge, 2400 Zion Park Blvd., Springdale, Utah.

DATES: Written comments will be accepted until May 30, 2006.

ADDRESSES: Written comments should be sent to Steve Gibbons, National Natural Landmarks Coordinator, North Cascades National Park, 810 State Route 20, Sedro Woolley, Washington 98284, or to his Internet address: Steve_Gibbons@nps.gov.

FOR FURTHER INFORMATION CONTACT:

Steve Gibbons at 360-856-5700, extension 306.

SUPPLEMENTARY INFORMATION: The Irvine Ranch Land Reserve represents significant biological resources of Mediterranean shrublands, including extensive areas of chaparral and coastal sage scrub associations. These chaparral and coastal sage scrub areas present one of the largest extant areas of this association remaining in the South Pacific Border Province. It is the presence of these large and relative undisturbed ecosystems and their inherent biological diversity that provide the uniqueness of this area. In commensurate with its biological significance the Irvine Ranch Land Reserve geologically represents a remarkably unique, long time-range stratigraphic succession that shows the linkage between tectonic framework, provenances, sedimentology, paleoenvironments, paleontology, paleoclimate, landscape evolution and geologic history. In this regard it is not only outstanding, but represents one of the most critical time intervals and locations in the evolution of the South Pacific Border Province.

Information on the National Natural Landmarks Program can be found in 36 CFR Part 62 or on the Internet at <http://www.nature.nps.gov/nnl>.

Dated: March 28, 2006.

Fran Mainella,

Director, National Park Service.
