Title: NSPS for Beverage Can Surface Coating (Renewal).

ICR Numbers: EPA ICR Number 0663.09, OMB Control Number 2060-0001.

ICR Status: This ICR is scheduled to expire on April 30, 2006. Under OMB regulations, the Agency may continue to

conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Respondents are owners or operators of beverage can surface coating facilities. These standards apply to each beverage can surface coating operation in which organic coatings are applied (exterior base coat operations, over varnish coating operations, and inside spray coating operations) that commenced construction, modification or reconstruction after November 26, 1980. Owners or operators of the affected facilities described must make initial reports when a source becomes subject to the standards, conduct and report on a performance test, demonstrate and report on continuous monitor performance, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility. Semiannual reports of excess emissions are required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to New Source Performance Standards (NSPS).

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 43 hours per

response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of beverage can surface coating facilities.

Estimated Number of Respondents: 48.

Frequency of Response: Initially, Semiannually, On Occasion.

Estimated Total Annual Hour Burden: 5,134.

Estimated Total Annual Cost: \$515,230, which includes \$0 capital/startup costs, \$100,800 annual O&M costs, and \$414,430 annual labor costs.

Changes in the Estimates: There is an increase of 492 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to an expansion of the calculations to include managerial and clerical labor rates. The increase in O&M costs is due to an increase in equipment maintenance costs.

Dated: March 29, 2006.

Oscar Morales,

Director, Collection Strategies Division.

SUPPLEMENTARY INFORMATION: As part of the reformulation of ocean policy, the U.S. Ocean Action Plan (OAP) developed a governance structure that coordinates the tasks and goals of all of the Federal agencies involved in ocean science and management. This multi-tiered governance structure has the goal of advancing ocean science and use in an integrated and productive manner. To that end, the JSOST, as directed by the OAP and governed by the Committee on Ocean Policy (COP), the NSTC, and the Interagency Committee on Ocean Science and Resource Management Integration (ICOSRMI), will develop an Ocean Research Priorities Plan. The goal of the Ocean Research Priorities Plan is to formulate the priorities for ocean science and technology initiatives across the wide scope of societal interests. The Ocean Research Priorities Plan will subsequently be complemented by the Ocean Research Priorities Implementation Strategy that will define the fundamental principles for guiding actions and programs in support of the research priorities.
