NUCLEAR WASTE TECHNICAL REVIEW BOARD

Board Meeting

Board Meeting: May 9, 2006—McLean, Virginia; The U.S. Nuclear Waste Technical Review Board will meet to discuss the Department of Energy's (DOE) proposed implementation of a canister system for transportation, aging, and disposal (TAD) of spent nuclear fuel.

Pursuant to its authority under 5051 of Public Law 100-203, Nuclear Waste Policy Amendments Act of 1987, the U.S. Nuclear Waste Technical Review Board will meet in McLean, Virginia, on Tuesday May 9, 2006. The Board was charged in the Nuclear Waste Amendments Act of 1987 with conducting an independent review of the technical and scientific validity of U.S. Department of Energy (DOE) activities related to disposing of, packaging, and transporting spent nuclear fuel and high-level radioactive waste. At the May meeting, the Board will review DOE efforts to develop and implement a "clean canister" or "TAD" approach to waste management. If the TAD concept is adopted, nuclear utilities would seal spent fuel into canisters at reactor sites. The canisters could then be loaded into casks for transportation, aging, or disposal of the waste. Also on the agenda is a discussion of infiltration data and an update on Yucca Mountain surface-facilities-design.

A final meeting agenda will be available on the Board's Web site (<http://www.nwtrb.gov>) approximately one week before the meeting date. The agenda also may be obtained by telephone request at that time. The meeting will be open to the public, and opportunities for public comment will be provided.

The meeting will be held at the Hilton Tysons Corner; 7920 Jones Branch Drive; McLean, Virginia 22102; telephone 703-847-5000; fax 703-761-5100.

The meeting will begin at 8 a.m. with an overview of the Yucca Mountain program and the TAD canister concept by DOE representative and reactions to the TAD program by industry representatives. After lunch, additional presentations will discuss the technical analyses that support the TAD decision and the effects of adopting a TAD system on design of Yucca Mountain program and the TAD canister concept by DOE representatives and reactions to the TAD program by industry representatives. After lunch, additional presentations will discuss the technical
