DEPARTMENT OF THE INTERIOR

Minerals Management Service

Agency Information Collection Activities: Submitted for Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of a revision of a currently approved information collection (OMB Control Number 1010-0103).

SUMMARY: To comply with the Paperwork Reduction Act of 1995 (PRA), we are notifying the public that we have submitted to OMB an information collection request (ICR) to renew approval of the paperwork requirements in the regulations under 30 CFR part 202—Royalties and part 206—Product Valuation. This notice also provides the public a second opportunity to comment on the paperwork burden of these regulatory requirements. The title of this ICR is “30 CFR part 202—Royalties, subpart C—Federal and Indian Oil, and subpart J—Gas Production From Indian Leases; and part 206—Product Valuation, subpart B—Indian Oil, and subpart E—Indian Gas.” The title reflects the previous consolidation of portions of six ICRs relating to Indian oil and gas leases. The six ICRs were previously titled:

- 1010-0061: 30 CFR part 206, subpart B—Indian Oil, § 206.55—Determination of Transportation Allowances (Form MMS-4110, Oil Transportation Allowance Report).

- 1010-0075: 30 CFR part 206, subpart E—Indian Gas, § 206.178—How do I determine a transportation allowance? (Form MMS-4295, Gas Transportation Allowance Report), and § 206.180—How do I determine an actual processing allowance? (Form MMS-4109, Gas Processing Allowance Summary Report).

- 1010-0095: 30 CFR part 206—Product Valuation, Subpart B—Indian Oil, § 206.54; subpart C—Federal Oil, § 206.109; subpart D—Federal Gas, §§ 206.156 and 206.158; and Subpart E—Indian Gas, § 206.177 (Form MMS-4393, Request to Exceed Regulatory Allowance Limitation).

Note: ICR 1010-0095 (discontinued May 25, 2005) referenced both Indian and Federal citations. Indian citations now are referenced in 1010-0103, and Federal citations are referenced in 1010-0136; each ICR uses Form MMS-4393. However, the form resides in ICR 1010-0136 where most of the burden hours are incurred.

- 1010-0103: 30 CFR part 206, subpart E—Indian Gas (Form MMS-4411, Safety Net Report).

- 1010-0104: 30 CFR part 206, subpart E—Indian Gas, §§ 206.172, 206.173, and 206.176 (Form MMS-4410, Accounting for Comparison [Dual Accounting]).

- 1010-0138: 30 CFR part 206, subpart B, Establishing Oil Value on Royalty Due on Indian Leases.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR part 202—Royalties, subpart C—Federal and Indian Oil, and subpart J—Gas Production From Indian Leases; and part 206—Product Valuation, subpart B—Indian Oil, and subpart E—Indian Gas.

OMB Control Number: 1010-0103.

Bureau Form Number: Forms MMS-4109, MMS-4110, MMS-4295, MMS-4410, and MMS-4411. Form MMS-4393 is used with this ICR (Indian oil and gas) and also with ICR 1010-0136 (Federal oil and gas) where the form resides.

Abstract: The Secretary of the U.S. Department of the Interior under the Mineral Leasing Act (30 U.S.C. 1923) and the Outer Continental Shelf Lands Act (43 U.S.C. 1353) is responsible for matters relevant to mineral resource development on Federal and Indian lands and the Outer Continental Shelf (OCS) including managing the production of minerals from Federal and Indian lands and the OCS, collecting royalties from lessees who produce minerals, and distributing the funds collected in accordance with applicable laws. The Secretary has a trust responsibility to manage Indian lands and seek advice and information from Indian beneficiaries. The MMS performs the royalty management functions and assists the Secretary in carrying out the Department’s trust responsibility for Indian lands.

Background

When a company or an individual enters into a lease to explore, develop, produce, and dispose of minerals from

Federal or Indian lands, that company or individual agrees to pay the lessor a share (royalty) of the value received from production from the leased lands. The lease creates a business relationship between the lessor and the lessee. The lessee is required to report various kinds of information to the lessor relative to the disposition of the leased minerals. Such information is similar to data reported to private and public mineral interest owners and is generally available within the records of the lessee or others involved in developing, transporting, processing, purchasing, or selling of such minerals. The information MMS collects includes data necessary to ensure that royalties are accurately valued and appropriately paid or distributed.

Regulations at 30 CFR part 202, subparts C and J, and part 206, subparts B and E, govern the valuation of oil and gas produced from leases on Indian lands. Indian tribes and individual Indian mineral owners receive all royalties generated from their lands. Determining product valuation is essential to ensure that Indian tribes and individual Indian mineral owners receive payment on the full value of the minerals removed from their lands. Tribal representatives have expressed their concern that the Secretary continue to fulfill all trust and fiduciary duties and ensure that the correct royalty is received from Indian lands. Failure to collect the data described in this information collection could result in the undervaluation of leased minerals on Indian lands.

The data collected and associated forms are necessary to perform the MMS regulatory functions and are discussed in detail below. All data reported is subject to subsequent audit and adjustment.

Indian Oil

Regulations at 30 CFR part 206, subpart B, which govern the valuation for royalty purposes of oil produced from Indian oil and gas leases (tribal and allotted), must be consistent with mineral leasing laws, other applicable laws, and lease terms. Regulations at § 206.52 explain how lessees must determine the value of oil produced from Indian oil and gas leases. Generally, the regulations provide that lessees determine the value of oil based on: (1) The gross proceeds under an arm's-length contract, (2) a series of benchmarks under a non-arm's-length contract, or (3) major portion analysis. These oil valuation methods are eligible for applicable transportation allowances.

Form MMS-4110, Oil Transportation Allowance Report

Under certain circumstances, the regulations authorize lessees to deduct from royalty payments the reasonable actual costs of transporting the royalty portion of produced minerals from the lease to a sales point not in the immediate lease area. The regulations establish a limit on transportation allowances for oil at 50 percent of the value of the oil at the point of sale. From information collected on Form MMS-4110: (1) MMS verifies transportation allowances during the product valuation verification to determine if the lessee reported and paid the proper royalty amount; and (2) MMS and tribal personnel evaluate whether the transportation allowances reported and claimed by lessees are within regulatory allowance limitations. Form MMS-4110 is used for both arm's-length and non-arm's-length contracts.

To receive an oil transportation allowance, lessees must submit Form MMS-4110 before or in the same month that they report the transportation allowance on Form MMS-2014, Report of Sales and Royalty Remittance (OMB Control Number 1010-0140, expiration date October 31, 2006). After the initial reporting period and for succeeding reporting periods, lessees must submit page one of Form MMS-4110 (and Schedule 1) within 3 months after the end of the calendar year, or after the applicable contract or rate terminates or is modified or amended, whichever is earlier, unless MMS approves a longer period. Completed Form MMS-4110 and supporting schedules summarize actual operating, maintenance, and overhead costs, as well as depreciation and undepreciated capital investment costs.

Indian Gas

Regulations at 30 CFR part 206, subpart E, govern the valuation for royalty purposes of natural gas produced from Indian oil and gas leases. The regulations apply to all gas production from Indian oil and gas leases (tribal and allotted), except leases on the Osage Indian Reservation.

Form MMS-4411, Safety Net Report

The safety net calculation establishes the minimum value, for royalty purposes, of natural gas production from Indian oil and gas leases. This reporting requirement ensures that Indian lessors receive all royalties due and aids MMS compliance efforts.

The regulations require lessees to submit Form MMS-4411 when gas production from an Indian oil or gas

lease is sold beyond the first index pricing point. The lessee submits safety net prices, for the previous calendar year, to MMS annually (by June 30) using this form.

Form MMS-4410, Accounting for Comparison [Dual Accounting]

Most Indian leases contain the requirement to perform accounting for comparison (dual accounting) for gas produced from the lease. Lessees must elect to perform actual dual accounting as defined in 30 CFR 206.176 or alternative dual accounting as defined in 30 CFR 206.173.

According to 30 CFR 206.176, dual accounting is defined as the greater of the following two values:

- (1) The value of gas prior to processing, less any applicable allowances, or
- (2) The combined value of residue gas and gas plant products resulting from processing the gas, less any applicable allowances, plus any drip condensate associated with the processed gas recovered downstream of the point of royalty settlement, without resorting to processing, less applicable allowances.

Lessees use Form MMS-4410 to certify that dual accounting is not required on an Indian lease or to make an election for actual or alternative dual accounting for Indian leases.

Form MMS-4410 (Part A), Certification for Not Performing Dual Accounting, requires lessees to identify the MMS-designated areas where the leases are located and provide specific justification for not performing dual accounting. Part A is a one-time notification, until any changes occur in gas disposition. Part A lists the following acceptable reasons for not performing dual accounting: (1) The lease terms do not require dual accounting; (2) none of the gas from the lease is ever processed; (3) gas has a Btu content of 1,000 Btu's per cubic foot or less at the lease's facility measurement point(s); (4) none of the gas from the lease is processed until after gas flows into a pipeline with an index located in an index zone; and (5) none of the gas from the lease is processed until after gas flows into a mainline pipeline not located in an index zone.

Form MMS-4410 (Part B), Election to Perform Actual Dual Accounting or Alternative Dual Accounting, allows MMS to collect the lessee's elections to perform actual dual accounting or alternative dual accounting. A lessee makes an election by checking either the actual or alternative dual accounting box for each MMS-designated area where its leases are located. Part B also includes the lessee's lease prefixes

within each MMS-designated area to assist lessees in making the appropriate election. The election to perform actual or alternative dual accounting applies to all of a lessee's Indian leases in each MMS-designated area. The first election to use the alternative dual accounting is effective from the time of election through the end of the following calendar year. Thereafter, each election to use the alternative dual accounting methodology must remain in effect for 2 calendar years. However, lessees may return to the actual dual accounting methodology only at the beginning of the next election period or with written approval from MMS and the tribal lessors for tribal leases, and from MMS for Indian allotted leases in the MMS-designated area (30 CFR 206.173(a)).

Form MMS-4295, Gas Transportation Allowance Report

Under certain circumstances, the regulations authorize lessees to deduct from royalty payments the reasonable actual costs of transporting the royalty portion of produced minerals from the lease to a processing or sales point not in the immediate lease area. The regulations establish a limit on transportation allowance deductions for gas at 50 percent of the value of the gas at the point of sale. The MMS and tribal personnel use the information collected on Form MMS-4295 to evaluate whether the non-arm's-length or no contract transportation allowances reported and claimed by lessees are reasonable, actual costs and are within regulatory allowance limitations. To take a non-arm's-length or no contract transportation deduction, a lessee must submit Form MMS-4295 within 3 months after the end of the 12-month period to which the allowance applies.

Form MMS-4109, Gas Processing Allowance Summary Report

When gas is processed for the recovery of gas plant products, lessees

may claim a processing allowance. The regulations establish a limit of 66²/₃ percent of the value of each gas plant product as an allowable gas processing deduction. The MMS normally accepts the cost as stated in the lessee's arm's-length processing contract as being representative of the cost of the processing allowance. In those instances where gas is being processed through a lessee-owned plant, the lessee must base processing costs on the actual plant operating and maintenance expenses, depreciation, and a reasonable return on investment. The allowance is expressed as a cost per unit of individual gas plant products. Lessees may take processing allowances as a deduction from royalty payments.

The MMS and tribal personnel use the information collected on Form MMS-4109 to evaluate whether the non-arm's-length or no contract processing allowances reported and claimed by lessees are reasonable, actual costs and are within regulatory allowance limitations. To take a non-arm's-length or no contract processing deduction, lessees must submit Form MMS-4109 within 3 months after the end of the 12-month period to which the allowance applies.

Indian Oil and Gas

Form MMS-4393, Request to Exceed Regulatory Allowance Limitation

Form MMS-4393 is used for both Federal and Indian leases. Most of the burden hours are incurred on Federal leases; therefore, the form and all the burden hours are approved under ICR 1010-0136. However, we included a discussion of the form in this ICR as well.

Upon proper application from the lessee, MMS may approve an oil or gas transportation allowance in excess of 50 percent (Federal or Indian) or a gas processing allowance in excess of 66²/₃ percent (Federal only). To request permission to exceed a regulatory

allowance limit, lessees must submit a letter to MMS explaining why a higher allowance limit is necessary and provide supporting documentation, including a completed Form MMS-4393. This form provides MMS with the data necessary to make a decision whether to approve or deny the request and track deductions on royalty reports.

Summary

The MMS is requesting OMB's approval to continue to collect this information. Not collecting this information would limit the Secretary's ability to discharge his/her duties and may also result in loss of royalty payments to Indian tribes and individual Indian mineral owners.

Proprietary information submitted to MMS under this collection is protected, and no items of a sensitive nature are collected.

In some cases the requirement to respond is mandatory, such as reporting royalty values or declaring the type of dual accounting election the lessee chooses to perform. In other cases, it is voluntary, such as asking permission to exceed a transportation allowance limit. For example, a lessee can request, but is not required to apply for, a transportation allowance deduction in excess of the regulatory limits. However, if no request is made, the transportation limitation is set by regulation.

Frequency of Response: Annually and on occasion.

Estimated Number and Description of Respondents: 123 Indian lessees.

Estimated Annual Reporting and Recordkeeping "Hour" Burden: 1,276 hours.

We have not included in our estimates certain requirements performed in the normal course of business and considered usual and customary. The following chart shows the estimated burden hours by CFR section and paragraph:
