processes and water systems (e.g., pulp and paper mill systems, sewage systems), as well as in industrial materials as a preservative (e.g., pulp/ paper products, leather products and hides, latex, wallpaper). As an agricultural pesticide, TCMTB is used for seed treatment of crops (e.g., barley, oats, rice, wheat, safflower, cotton, sugar beets). TCMTB has 23 tolerances in 40 CFR 180.288 for use as a fungicide on barley, beets, corn, cotton, oats, rice, safflower, sorghum and wheat. However, all agricultural uses will be canceled by the technical registrant with the exception of barley, oat, rice, wheat, safflower, cotton and sugar beets; these uses will be supported by two end-use registrants. Presently, there are 45 registered products containing TCMTB as an active ingredient and 4 pending products. The technical registrant of TCMTB will be canceling 25 TCMTB uses and 11 TCMTB products. The Agency's risk assessment identified residential, occupational and ecological risks of concern for some exposure scenarios. Because limited information is available for some exposure scenarios, conservative assumptions were sometimes used in the risk assessment. The Agency is interested in receiving any information that could assist in refining the risk assessment.

EPA is providing an opportunity, through this notice, for interested parties to provide comments and input on the Agency's risk assessment for TCMTB. Such comments and input could address, for example, the availability of additional data to further refine the risk assessments, such as ecological data to fill data gaps for aquatic toxicity studies for invertebrates and confirmatory worker exposure data for residential/occupational data gaps, or could address the Agency's risk assessment methodologies and assumptions as applied to this specific pesticide. Through this notice, EPA also is releasing for public comment its preliminary risk reduction options for TCMTB, and is providing an opportunity for interested parties to provide risk management proposals or otherwise comment on risk management.

EPÄ seeks to achieve environmental justice, the fair treatment and meaningful involvement of all people, regardless of race, color, national origin, or income, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural

practices, or other factors, may have atypical, unusually high exposure to TCMTB, compared to the general population.

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the Federal Register on May 14, 2004 (69 FR 26819) (FRL-7357-9), explains that in conducting these programs, the Agency is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of the issues, and degree of public concern associated with each pesticide. For TCMTB, a modified, 4-Phase process with one comment period and ample opportunity for public consultation seems appropriate in view of its refined risk assessment, few complex issues, and/or other factors. However, if as a result of comments received during this comment period EPA finds that additional issues warranting further discussion are raised, the Agency may lengthen the process and include a second comment period, as needed.

All comments should be submitted using the methods in ADDRESSES, and must be received by EPA on or before the closing date. Comments will become part of the Agency Docket for TCMTB. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA as amended directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product-specific data on individual enduse products and either reregistering products or taking other "appropriate regulatory action."

Section 408(q) of the FFDCA, 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA. This review is to be completed by August 3, 2006.

Didecyl Dimethyl Ammonium Chloride Risk Assessments and Preliminary Risk Reduction Options; Notice of Availability

AGENCY: Environmental Protection

Agency (EPA). **ACTION:** Notice.

SUMMARY: This notice announces the availability of EPA's risk assessments, preliminary risk reduction options, and related documents for the Group 1 Quat Cluster pesticide didecyl dimethyl ammonium chloride, and opens a public comment period on these documents. The public also is encouraged to suggest risk management ideas or proposals to address the risks identified. EPA is developing a Reregistration Eligibility Decision (RED), for didecyl dimethyl ammonium chloride through a modified, 4-Phase public participation process that the Agency uses to involve the public in developing pesticide reregistration and tolerance reassessment decisions. Through these programs, EPA is ensuring that all pesticides meet current health and safety standards.

DATED: Comments must be received on or before June 26, 2006.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2006-0338, by one of the following methods:

- Federal eRulemaking Portal: http://www.regulations.gov. Follow the on-line instructions for submitting comments.
- *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502C), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.
- Hand Delivery: OPP Regulatory
 Public Docket, Environmental
 Protection Agency, Rm. 119, Crystal
 Mall #2, 1801 S. Bell St., Arlington, VA.
 Deliveries are only accepted during the
 Docket's normal hours of operation
 (8:30 a.m. to 4 p.m., Monday through
 Friday, excluding legal holidays).
 Special arrangements should be made
 for deliveries of boxed information. The

Docket telephone number is (703) 305–5805.

• Important Note: OPP will be moving to a new location the first week of May 2006. As a result, from Friday, April 28 to Friday, May 5, 2006, the OPP Regulatory Public Docket will NOT be accepting any deliveries at the Crystal Mall #2 address and this facility will be closed to the public. Beginning on May 8, 2006, the OPP Regulatory Public Docket will reopen at 8:30 a.m. and deliveries will be accepted in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA 22202. The mail code for the mailing address will change to (7502P), but will otherwise remain the same. The OPP Regulatory Public Docket telephone number and hours of operation will remain the same after the

Instructions: Direct your comments to docket ID number EPA-HQ-OPP-2006-0338. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at http:// www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or email. The Federal regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the docket index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material,

is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available in the electronic docket at http://www.regulations.gov, or, if only available in hard copy, at the OPP Regulatory Public Docket at the location identified under "Delivery" and "Important Note." The hours of operation for this docket facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT:

Tracy Lantz, Antimicrobials Division, (7510C), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 308–6415; fax number: (703) 308–8481; e-mail address: lantz.tracy@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under FOR FURTHER INFORMATION CONTACT.

- B. What Should I Consider as I Prepare My Comments for EPA?
- 1. Submitting CBI. Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that vou claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

- 2. Tips for preparing your comments. When submitting comments, remember to:
- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/ or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns, and suggest alternatives.
- vii.Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

II. Background

A. What Action is the Agency Taking?

EPA is releasing for public comment its human health and environmental fate and effects risk assessments, preliminary risk reduction options, and related documents for didecyl dimethyl ammonium chloride, and encouraging the public to suggest risk management ideas or proposals. This chemical is an antimicrobial pesticide used in agricultural, food handling, commercial, institutional/industrial, residential and public access, and medical settings. EPA developed the risk assessments and preliminary risk reduction options for didecyl dimethyl ammonium chloride through a modified version of its public process for making pesticide reregistration eligibility and tolerance reassessment decisions. Through these programs, EPA is ensuring that pesticides meet current standards under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act (FQPA) of 1996.

Products containing this chemical are used as disinfectants, food and non-food contact sanitizers, wood preservatives, bacteriocide/bacteriostats, microbiocide/microbiostats, fungicide/fungistats, algaecides and virucides.

These products are used in agricultural, food handling, commercial,

institutional/industrial, residential and public access, and medical settings. Examples of registered uses in these settings include application to indoor and outdoor hard surfaces (e.g., walls, floors, tables, toilets, and other similar surfaces), eating utensils, laundry, carpets, agricultural tools and vehicles, egg shells, shoes, milking equipment and udders, humidifiers, medical instruments, human remains, ultrasonic tanks, reverse osmosis units, and water storage tanks. These products are also used in residential and commercial swimming pools, aquatic areas such as decorative ponds and decorative fountains, and industrial process and water systems such as re-circulating cooling water systems, drilling muds and packer fluids, oil well injections and wastewater systems. Additionally, these products are used for wood preservation through non-pressure and pressure-treatment methods. There are application methods of concern such as fogging in occupational settings. The Agency's risk assessment identified residential, ecological, and occupational risks of concern for some exposure scenarios. Due to limited information for some exposure scenarios, conservative assumptions were used in the risk assessment. The Agency is interested in receiving any information that could assist in refining the risk

EPA is providing an opportunity, through this notice, for interested parties to provide comments and input on the Agency's risk assessments for didecyl dimethyl ammonium chloride. Such comments and input could address, for example, the availability of additional data to further refine the risk assessments, such as higher tier modeling for once-through cooling towers, refinement of percent active ingredient in solution for pressure treatment of lumber, detailed use information (encompasses the information requested on secondary oil field recovery and food processing plants), confirmatory studies to support occupational scenarios, confirmatory data to establish the reliability of using the 10% transfer rate in the dietary assessment, wipe data to assess the children's dermal contact to treated decks and play sets, non-target plant phytotoxicity testing, acute sheepshead minnow testing, acute eastern oyster embryo larvae testing, chronic Daphnis manga testing, or could address the Agency's risk assessment methodologies and assumptions as applied to this specific pesticide. Through this notice, EPA also is releasing for public comment its preliminary risk reduction

options for didecyl dimethyl ammonium chloride, and is providing an opportunity for interested parties to provide risk management proposals or otherwise comment on risk management.

EPĂ seeks to achieve environmental justice, the fair treatment and meaningful involvement of all people, regardless of race, color, national origin, or income, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical, unusually high exposure to didecyl dimethyl ammonium chloride, compared to the general population.

EPA is applying the principles of public participation to all pesticides undergoing reregistration and tolerance reassessment. The Agency's Pesticide Tolerance Reassessment and Reregistration; Public Participation Process, published in the Federal Register on May 14, 2004 (69 FR 26819) (FRL-7357-9), explains that in conducting these programs, the Agency is tailoring its public participation process to be commensurate with the level of risk, extent of use, complexity of the issues, and degree of public concern associated with each pesticide. For didecyl dimethyl ammonium chloride, a modified, 4-Phase process with one comment period and ample opportunity for public consultation seems appropriate in view of its refined risk assessments and/or other factors. However, if as a result of comments received during this comment period EPA finds that additional issues warranting further discussion are raised, the Agency may lengthen the process and include a second comment period, as needed.

All comments should be submitted using the methods in ADDRESSES, and must be received by EPA on or before the closing date. Comments will become part of the Agency Docket for didecyl dimethyl ammonium chloride. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

B. What is the Agency's Authority for Taking this Action?

Section 4(g)(2) of FIFRA as amended directs that, after submission of all data concerning a pesticide active ingredient, "the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration," before calling in product specific data on individual end-use products and either reregistering products or taking other "appropriate regulatory action."

Section 408(q) of the FFDCA, 21 U.S.C. 346a(q), requires EPA to review tolerances and exemptions for pesticide residues in effect as of August 2, 1996, to determine whether the tolerance or exemption meets the requirements of section 408(b)(2) or (c)(2) of FFDCA. This review is to be completed by August 3, 2006.

Sabadilla Alkaloids; Reregistration Eligibility Decision for Low Risk Pesticide; Notice of Availability

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of EPA's Reregistration Eligibility Decision (RED) for the pesticide sabadilla alkaloids, and opens a public comment period on this document, related risk assessments, and other support documents. EPA has reviewed the low risk pesticide sabadilla alkaloids through a modified, streamlined version of the public participation process that the Agency uses to involve the public in developing pesticide reregistration and tolerance reassessment decisions. Through these programs, EPA is ensuring that all pesticides meet current health and safety standards.

DATES: Comments must be received on or before June 26, 2006.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPP-2006-0293, by one of the following methods:

- Federal eRulemaking Portal: http://www.regulations.gov. Follow the on-line instructions for submitting comments.
- *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502C), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.
