

the proposed action. Table 3 summarizes the radiological environmental impacts of the proposed EPU at BVPS-1 and 2.

*Alternatives to Proposed Action*

As an alternative to the proposed action, the NRC staff considered denial of the proposed EPU (i.e., the “no-action” alternative). Denial of the application would result in no change in the current environmental impacts.

However, if the EPU were not approved, other agencies and electric power organizations may be required to pursue other means of providing electric generation capacity to offset future demand such as fossil fuel power generation. Construction and operation of a fossil-fueled plant would create impacts in air quality, land use, and waste management significantly greater than those identified for the EPU at BVPS-1 and 2.

Implementation of the proposed EPU would have less impact on the environment than the construction and operation of a new fossil-fueled generating facility or the operation of fossil-fueled facilities outside the service area.

*Alternative Use of Resources*

This action does not involve the use of any resources not previously considered in the FESs.

TABLE 3.—SUMMARY OF RADIOLOGICAL ENVIRONMENTAL IMPACTS

Gaseous Effluents and Doses.	Slight increase in dose due to gaseous effluents; doses to individuals offsite will remain within NRC limits.
Liquid Effluents and Doses ..	14-percent increase in liquid effluent release concentrations; 14-percent increase for doses due to liquid effluent pathway are still well within the 10 CFR Part 50, Appendix I guidelines, so no significant increase in dose to public is expected.
Solid Radioactive Waste .....	Volume of solid waste is not expected to increase; within FES estimate; increase in amount of spent fuel assemblies; future application for dry cask storage.
In-plant Dose .....	Occupational dose could increase by 7.9 percent; will remain within FES estimate.
Direct Radiation Dose .....	Dose expected to increase the same percentage as the EPU for dose rates offsite; expected annual dose continues to meet NRC/EPA limits.
Postulated Accidents .....	Licensee concluded doses are within NRC limits.
Fuel Cycle and Transportation.	Impacts in Tables S-3 and S-4 in 10 CFR Part 51, “ENVIRONMENTAL PROTECTION REGULATIONS FOR DOMESTIC LICENSING AND RELATED REGULATORY FUNCTIONS” are bounding.

*Agencies and Persons Consulted*

In accordance with its stated policy, on May 3, 2006, the NRC staff consulted with the Pennsylvania State official, Lawrence Ryan, of the Pennsylvania Department of Environmental Protection, regarding the environmental impact of the proposed action. The State official had no comments.

*Finding of No Significant Impact*

On the basis of the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee’s application dated October 4, 2004, as supplemented by letter dated July 28, 2005.
