RIN 1120-AB42

Smoking/No Smoking Areas

AGENCY: Bureau of Prisons, Justice.

ACTION: Proposed rule.

SUMMARY: In this document, the Bureau of Prisons (Bureau) proposes to revise regulations pertaining to smoking/no smoking for inmates in Bureau facilities. The revised regulations indicate that smoking is generally prohibited in and on the grounds of Bureau institutions and offices, with the following two exceptions: Smoking is permitted as part of an authorized inmate religious activity; and, for Bureau staff and official visitors, smoking is permitted only in smoking areas designated by the Warden. This rule also clarifies that possession of smoking apparatus and tobacco in any form is prohibited for inmates, unless as part of an authorized inmate religious activity. Smoking is defined as inhaling the smoke of any substance through the use of smoking

apparatus including, but not limited to, cigars, cigarettes, or pipes. We intend this amendment to promote a clean air environment and to protect the health and safety of staff and inmates.

SUPPLEMENTARY INFORMATION: In this document, the Bureau proposes to revise regulations pertaining to smoking/no smoking for inmates in Bureau facilities. The revised regulations indicate that smoking is generally prohibited in and on the grounds of Bureau institutions and offices, with the following two exceptions: Smoking is permitted as part of an authorized inmate religious activity; and, for Bureau staff and official visitors, smoking is permitted only in smoking areas designated by the Warden. This rule also clarifies that possession of smoking apparatus and tobacco in any form is prohibited for inmates, unless as part of an authorized inmate religious activity. Smoking is defined as inhaling the smoke of any substance through the use of smoking apparatus including, but not limited to, cigars, cigarettes, or pipes. We intend this amendment to promote a clean air environment and to protect the health and safety of staff and inmates.

A final rule was published on this subject on March 24, 2004 (69 FR 13735), after publication of a proposed rule on November 25, 1998 (63 FR 65502), and a modification on May 6, 1999 (64 FR 24468). The 2004 final rule prohibited indoor smoking areas for general inmate use, but allowed Wardens to designate outdoor smoking areas for general inmate use.

Several comments to the proposed rule and modification objected to allowing even outdoor smoking areas for inmates. These commenters instead proposed a total ban on the possession and use of lighted tobacco products for all prisoners. The commenters

expressed dissatisfaction with the enforcement of the then-current smoking policy. Also, commenters expressed a general belief that prohibiting indoor smoking within Bureau facilities would have little impact on reducing smoking and improving the air quality. Two commenters on the original proposed rule also suggested that all tobacco products be banned and no tobacco products be sold in federal prisons.

As stated in the 2004 final rule document, the Bureau does not believe that removing tobacco products from the institution's commissary will have a significant economic impact as defined by the controlling statutes noted below. While there may be some impact on commissary profits, the Bureau believes that the health benefits outweigh any potential drop in such profits.

Also, when the 2004 regulations were implemented, Bureau policy mandated smoking cessation programs for inmates at all institutions to help ease inmate concerns about the possibility of no smoking areas. Nicotine patches are now available at the inmate's expense through commissary purchase.

In consideration of the concerns raised by these commenters and to further strengthen the Bureau's intention to protect the health and safety of both staff and inmates, we propose to revise the Bureau's smoking regulations to indicate that smoking is generally prohibited in and on the grounds of Bureau institutions and offices, with the following two exceptions: Smoking is permitted as part of an authorized inmate religious activity; and, for Bureau staff and official visitors, smoking is permitted only in smoking areas designated by the Warden.

Also in consideration of the commenters' concerns, this rule will prohibit inmate possession of smoking apparatus and tobacco in any form, unless as part of an authorized inmate religious activity.

The hazards associated with tobacco smoke and second-hand inhalation of smoke by nonsmokers is well documented and the known health risks associated with smoking support implementation of stricter smoking/no smoking rules. The Bureau believes that prohibiting smoking, including inmate possession of smoking apparatus and tobacco in any form, with only limited exceptions for authorized inmate religious activity and for Bureau staff and official visitors, designated smoking areas is the most practicable step toward promoting a clean air environment and protecting the health and safety of staff and inmates.
