## Grain Inspection, Packers & Stockyards Administration

*Title:* Inspection Report—Insects in Grain.

*OMB Control Number:* 0580-NEW.

*Summary of Collection:* An agreement dated November 5, 1981, between the Grain Inspection, Packers & Stockyard Administration (GIPSA) and the Animal and Plant Health Inspection Service (APHIS), Plant Protection and Quarantine originally outlined procedures and responsibilities for the phytosanitary inspection and certification of export grain. The United States is a signatory of the International Plant Protection Convention of the Food and Agriculture Organization which requires a phytosanitary certificate to be issued for certain agricultural products. Official agencies and GIPSA are jointly responsible for providing official grading, inspection, and sampling services to aid in the efficient marketing of grain, grain by products, rice, and other graded commodities covered under the United States Grain Standards Act and the Agricultural Marketing Act in interstate and foreign commerce.

*Need and Use of the Information:* When live adult insects, larvae, or other pests are found in export shipments, the type of pest (if identifiable), the rate of occurrence for each type of pest, the subplot number, and the hold number(s) carrier information shall be recorded on Form FGIS 921, Inspection Log (vessels), and Form FGIS 921-2, Inspection Report—Insects in Grain. All insect and other pests are identified by common name on the report, so that APHIS can issue a Federal Phytosanitary Certificate; or inform GIPSA and the exporter or their agent of the circumstances which prevent the issuance of a phytosanitary certificate.

*Description of Respondents:* Business or other for-profit; Federal Government; State, Local or Tribal Government.

*Number of Respondents:* 35.

*Frequency of Responses:* Recordkeeping; Reporting: On occasion; Weekly; Monthly; Semi-annually; Annually.
