NUCLEAR REGULATORY COMMISSION

[Docket No. 030-29288]

Notice of Consideration of Amendment Request for Decommissioning of the Pennsylvania Department of Environmental Protection, Quehanna Site, Karthaus, Pennsylvania and Opportunity To Request a Hearing

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of amendment request and opportunity to request a hearing.

DATE: A request for a hearing must be filed by July 21, 2006.

FOR FURTHER INFORMATION CONTACT:

James Kottan, Project Manager, Decommissioning Branch, Division of Nuclear Materials Safety, Region I, U.S. Nuclear Regulatory Commission, King of Prussia, PA 19406. Telephone: (610) 337-5214; fax number: (610) 337-5269; or e-mail: jjk@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) is considering issuance of a license amendment to By-Product Material License No. 37-17860-02 issued to the Pennsylvania Department of Environmental Protection (the licensee), to authorize decommissioning of its Quehanna Facility in Karthaus, Pennsylvania under revision four of the licensee's Decommissioning Plan (DP).

The licensee had been decommissioning the Quehanna Site in accordance with the conditions described in License No. 37-17860-02, and in February 2005, after

decommissioning activities had been completed, the licensee submitted the Final Status Survey Report for the site. In May of 2005, the NRC conducted an independent confirmatory survey of the Quehanna Site and determined that the facility was contaminated in excess of the limits specified in the NRC approved DP. Since that time the licensee has determined that the facility contained concrete with volumetric radioactive contamination that migrated to the surface of the concrete resulting in the failure of the site to meet the limits for unrestricted release as described in the NRC approved DP. Because the NRC approved DP release limits were based on surface contamination, and volumetric contamination is present at the site, the NRC approved DP cannot be used to release the site for unrestricted release. Therefore, the licensee has submitted to the NRC a revised DP (revision 4) incorporating the dose based criteria of 10 CFR 20, Subpart E, Radiological Criteria for License Termination for release of the site for unrestricted use. An NRC administrative review, documented in a letter to the Pennsylvania Department of Environmental Protection dated April 21, 2006, found revision 4 of the DP acceptable to begin a technical review.

If the NRC approves the DP, the approval will be documented in an amendment to NRC License No. 37-17860-02. However, before approving the proposed amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report and an Environmental Assessment and/or an Environmental Impact Statement. The license will be terminated if this amendment is approved following completion of decommissioning activities and verification by the NRC that the radiological criteria for license termination have been met.

II. Opportunity To Request a Hearing

The NRC hereby provides notice that this is a proceeding on an application for a license amendment regarding decommissioning of the Quehanna Site located in Karthaus, Pennsylvania. In accordance with the general requirements in Subpart C of 10 CFR Part 2, as amended on January 14, 2004 (69 FR 2182), any person whose interest may be affected by this proceeding and who desires to participate as a party must file a written request for a hearing and a specification of the contentions which the person seeks to have litigated in the hearing.
