

conditions and requirements for us to permit uses on national wildlife refuges in Alaska.

(1) Section 810 requires that we evaluate the effects of any proposed use on subsistence uses and needs.

(2) Section 1303 establishes requirements and conditions for permitting use or construction of cabins, and states that we will issue no special use permits for cabins unless the permit applicant provides certain items of information.

(3) Section 1307 contains provisions concerning persons and entities to whom we are to give special rights and preferences with respect to providing commercial visitor services (except for guided hunting and sport fishing services) on units of the National Wildlife Refuge System in Alaska.

Our general refuge regulations provide for public entry for specialized purposes, including economic activities such as the operation of guiding, outfitting, and other visitor services on refuges by concessionaires or cooperators under appropriate contracts or legal agreements (see 50 CFR 25.61) or special use permits (see 50 CFR

26.22(b) and 26.25). Alaska refuge regulations provide the authorities and procedures for issuing permits on Alaska refuges, most of which are for providers of services and facilities to the public (see 50 CFR 36.37 and 36.41). We issue permits for a specific period as determined by the type and location of the use or visitor service provided.

In addition to the above permits, Kodiak National Wildlife Refuge issues special use permits to allow public recreational use of certain easement lands in accordance with the terms of a private land conservation easement among the United States, the State of Alaska, and Koniag, Inc. Our previous request for approval of this information collection did not include burden estimates for these permits. When we send our renewal request to OMB, we will increase our burden estimates (see table below) to include the Kodiak permits.

We use information provided on the permit application to determine if the applicant is qualified and eligible for a permit. For competitively awarded permits, we use the information to ensure that we select the most qualified

applicants to receive the benefit of a refuge permit. Where applicable, we also use the information to determine the applicant's eligibility for special rights and preferences required by section 1307 of ANILCA. Refuge managers must determine or ensure that the proposed uses are compatible with the purposes of the refuge, provide safe and high-quality visitor services to the public, and are consistent with other statutory and regulatory requirements for management of Alaska refuges. Alaska refuge managers need the information requested on the permit application to evaluate potential impacts of the proposed uses on refuge resources and other refuge users.

Title: Special Use Permit Application for National Wildlife Refuges in Alaska.

OMB Control Number: 1018-0014.

Form Number: FWS Form 3-2001.

Frequency of Collection: On occasion.

Description of Respondents:

Individuals and households, business and other for-profit institutions, not-for-profit institutions, farms, and State, local, or tribal governments.

Information Collection Burden Estimate:

Type of permit application	Annual number of respondents	Completion time (hours)	Annual burden (hours)
Competitively issued permit	180	30	5,400
Non-competitively issued permit	410	0.8	328
Combined Total	590	5,728

We invite comments concerning this proposed information collection on: (1) Whether or not the collection of information is necessary for the proper performance of our functions, including whether or not the information will have practical utility; (2) the accuracy of our estimate of the burden of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents. This information collection is part of a system of records covered by the Privacy Act (5 U.S.C. 552(a)).

Dated: May 19, 2006.

Hope G. Grey,

*Information Collection Clearance Officer,
Fish and Wildlife Service.*

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

**Draft Environmental Assessment/
Habitat Conservation Plan; Issuance of
a Section 10(a)(1)(B) Permit for
Incidental Take of the Golden-Cheeked
Warbler and Black-Capped Vireo by
TXU Electric Delivery During the
Construction and Operation of a 16-
Mile 138 kV Transmission Line in
Portions of Bell and Coryell Counties,
TX**

AGENCY: U.S. Fish and Wildlife Service, Interior.

ACTION: Notice of availability; receipt of application.

SUMMARY: TXU Electric Delivery (Applicant) has applied to the U.S. Fish and Wildlife Service (Service) for an incidental take permit (TE-125388-0) pursuant to section 10(a)(1)(B) of the Endangered Species Act (Act) of 1973, as amended. The requested permit, which is for a period of five years, would authorize incidental take of the

golden-cheeked warbler (*Dendroica chrysoparia*) and black-capped vireo (*Vireo atricapilla*). The proposed take would occur as a result of the construction and continued operation of a 16-mile (26-kilometer), 138 kV transmission line within Bell and Coryell counties, Texas. We invite the public to review and comment on the permit application and associated draft Environmental Assessment/Habitat Conservation Plan (EA/HCP).

DATES: To ensure consideration, written comments must be received on or before July 25, 2006.

ADDRESSES: Persons wishing to review the application may obtain a copy by writing to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Room 4102, Albuquerque, New Mexico 87103. Persons wishing to review the draft EA/HCP may obtain a copy by contacting Scott Rowin, U.S. Fish and Wildlife Service, 10711 Burnet Road, Suite 200, Austin, Texas 78758 (512/490-0057). Documents will be available for public inspection by written request, by appointment only,

during normal business hours (8 a.m. to 4:30 p.m.) at the Service's Austin office. Written data or comments concerning the application and draft EA/HCP should be submitted to the Supervisor, U.S. Fish and Wildlife Service, 10711 Burnet Road, Suite 200, Austin, Texas 78758. Please refer to permit number TE-125388-0 when submitting comments. All comments received, including names and addresses, will become a part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT:

Scott Rowin at U.S. Fish and Wildlife Service Austin office, 10711 Burnet Road, Suite 200, Austin, Texas 78758 (512) 490-0057 or by e-mail, Scott_Rowin@fws.gov.

SUPPLEMENTARY INFORMATION: The Applicant has applied to the Service for a section 10(a)(1)(B) incidental take permit for a period of five years in order to authorize incidental take of the golden-cheeked warbler and black-capped vireo.

Section 9 of the Act prohibits the "taking" of endangered species such as the Houston toad. However, the Service, under limited circumstances, may issue permits to take endangered wildlife species incidental to, and not the purpose of, otherwise lawful activities.

We provide this notice under section 10(c) of the Act (16 U.S.C. 1531 et seq.) and its implementing regulations (50 CFR 17.22), and the National Environmental Policy Act (42 U.S.C. 4371 et seq.) and its implementing regulations (40 CFR 1506.6).

As identified in the draft EA/HCP, two alternate alignments (A and B) exist along Sevenmile Mountain for a distance of approximately two miles. It is unknown at this time which alignment will be selected for the transmission line. However, the Applicant requests the issuance of the permit to authorize incidental take of the endangered golden-cheeked warbler and black-capped vireo for either alignment. Regardless of which alignment is selected, the level of mitigation proposed in this permit is based on the maximum acreage of impacts that would result from the installation of the proposed transmission line. The proposed transmission line would be installed in response to increased demands for such services resulting from a growing population within the Applicant's service area.

The addition of this transmission line would provide the capacity and flexibility needed to continue to provide

reliable service to the Killeen—Copperas Cove loads.

The action authorized under this permit, if issued, would include the installation of a 138 kV transmission line for a distance of approximately 16 miles between the existing TXU Electric Delivery Copperas Cove Substation and the Brazos Electric Power Cooperative Ding Dong Substation. The proposed right-of-way width of the Proposed Alternative would vary between 16 feet and 70 feet. The proposed area to be permitted encompasses 1,365 acres and would encompass all areas of direct and indirect impact.

The alternative was selected by the Applicant and the Service as the preferred action as it would allow the development of the project while the HCP would minimize and offset the potential impact to the golden-cheeked warbler and black-capped vireo by providing for offsite conservation measures, which would be utilized to better manage the recovery of the species.

Applicant: TXU Electric Delivery has developed an HCP which has been included as part of the preferred alternative that would substantially avoid impacts to the golden-cheeked warbler and black-capped vireo. Impacts that cannot be avoided would be minimized and mitigated to the maximum extent practicable. Mitigation efforts under the proposed HCP would include, contributing \$1,690,000 to establish a non-wasting endowment for the golden-cheeked warbler and black-capped vireo management on the 4,500-acre Parrie Haynes Ranch (Ranch). Based on negotiations between TXU Electric Delivery, the Service, Texas Parks and Wildlife Department (TPWD), Texas Parks and Wildlife Foundation, and the Parrie Haynes Trust/Texas Youth Commission (landowner), which were initiated on November 15, 2005, this funding will be used for the establishment of the Ranch as an endangered species management site as mitigation for the affected golden-cheeked warbler and black-capped vireo habitat. Even though no endangered species management currently occurs on the Ranch, golden-cheeked warblers and black-capped vireos currently utilize significant amounts of habitat within the property, thus providing an ideal location for mitigation and enhanced species management. Additionally, the property is located adjacent to Fort Hood, creating an even larger block of actively managed habitat for both species.

The mitigation funding proposal consists of the creation of a non-wasting endowment fund to be maintained by

the Texas Parks and Wildlife Foundation, a non-profit organization. As determined by Texas Parks and Wildlife Foundation, to maintain the endowment and management of the site in perpetuity, approximately three to four percent of the interest will be rolled back into the account each year for inflation. The remaining interest will be used for endangered species restoration/enhancement activities and to fund a TPWD Wildlife Biologist/Technician position for endangered species management of the site. Once the endowment is established, TPWD will be responsible for on-going operations, management, and reporting.

The mitigation proposal will enable the Service and TPWD to actively manage significantly more golden-cheeked warbler and black-capped vireo habitat as opposed to acquiring habitat elsewhere. The proposal will assist the Service and TPWD in developing sound land management plans and practices, including but not limited to, assessing habitat conditions, developing land and wildlife/endangered species management plans, endangered species monitoring, vegetation management/manipulation, cowbird management, livestock management, exotic species control, public education, and fencing and other access provisions.

Richard McDonald,

Acting Regional Director, Region 2, Albuquerque, New Mexico.

Draft Comprehensive Conservation Plan and Environmental Assessment for Mingo, Pilot Knob, and Ozark Cavefish National Wildlife Refuges (NWRs), Wayne and Stoddard Counties, MO

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service announces that the Draft Comprehensive Conservation Plan (CCP) and Environmental Assessment (EA) is available for Mingo, Pilot Knob, and Ozark Cavefish NWRs, Missouri.

The CCP was prepared pursuant to the National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997, and the National Environmental Policy Act of 1969. Goals and objectives in the CCP
