Title: Reporting and Recordkeeping Requirements of the HCFC Allowance System.

ICR Numbers: 2014.03, OMB Control Number 2060-0498.

ICR Status: This ICR is scheduled to expire on June 30, 2006. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in Title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: In order to continue to meet its obligations under the Montreal Protocol on Substances that Deplete the Ozone Layer (Protocol) and the Clean Air Act Amendments of 1990 (CAAA), EPA maintains an allowance system for class II controlled substances or hydrochlorofluorocarbons (HCFCs). Under the Protocol, the U.S. is obligated to limit HCFC consumption (defined by the Protocol as production plus imports, minus exports) under a specific cap. The U.S. is also a signatory to amendments that froze HCFC production on January 1, 2004. EPA controls U.S. production and consumption of HCFCs by granting baseline allowances based on the historical activity levels of producers and importers coupled with a chemical-by-chemical phaseout. Since each allowance equals 1 kilogram of HCFC, EPA can monitor the quantity of HCFCs being produced, imported, exported, transformed, or destroyed. *There are two types of allowances:* consumption allowances and production allowances. Transfers of production and consumption allowances among producers and importers are allowed. Producers, importers, and exporters are required to submit to EPA quarterly reports of the quantity of HCFCs in each of their transactions; they are also required to report the quantity of HCFCs transformed or destroyed. EPA requires all producers, importers, and exporters maintain records such as Customs entry forms, bills of lading, sales records, and canceled checks to support their quarterly reports. The quarterly reports may be faxed or mailed to EPA and soon may be submitted electronically.
