

holding chief officer and line officer positions. The USFA is working to identify the demographic make up of metropolitan fire departments in the United States to provide input for program planning and to inform stakeholders of the demographic composition of firefighters. The

database will be used by USFA to guide programmatic decisions and provide the Fire Service and the public with information about firefighter demographics at an aggregate level. Fire departments are able to complete the demographic firefighter questionnaire by filling out a paper form and faxing

the completed form, or sending it in a return envelope.

Affected Public: Federal, State, local government, and career fire departments.

Estimated Total Annual Burden Hours: 39 Hours.

ANNUAL BURDEN HOURS

Project/activity (survey, form(s), focus group, worksheet, etc.)	Number of respondents (A)	Frequency of responses (B)	Burden hours per respondent (C)	Annual responses (AxB)	Total annual burden hours (AxBxC)
Questionnaire	115	1	.33 hrs (20 min)	115	39
Total	115	1	.33 hrs	115	39

Estimated Cost: The estimated costs to the government will be direct labor and associated overhead costs of \$12,625. There would be no costs to the respondent other than the minimal direct labor cost of a single firefighter or emergency service worker taking a small amount of time to complete the firefighter demographic form and this would be applicable only to those fire departments and emergency service agencies employing career firefighters. The estimate of respondent costs for those career departments is computed as follows: Estimated number of forms multiplied by the national mean hourly rate of a firefighter of \$18.95 multiplied by 1/3 (representing the estimated 20 minutes it takes to complete the firefighter demographic form). Using this equation, total estimated costs to respondents of \$726.42 is derived (115 estimated firefighter demographic forms x \$18.95 x 1/3 = 726.42). The average cost per firefighter demographic form is a minimal \$6.32. The respondents are under no obligation to complete the form and may refuse to do so or stop at any time. As a result, the average cost to the respondent of \$6.32 could easily not be incurred by refusing to fill out the firefighter demographic form.
