- Allow for exploration and development of the private mineral estate.
- Facilitate operator planning by setting park-specific operating standards.
- Provide educational outreach to operators, including guidance on the regulatory process for bringing operations into compliance with applicable legal requirements.
- Enhance coordination with State natural resource agencies to better manage and enforce oil and gas operations according to State standards.

- Evaluate the potential for NEPA streamlining for plugging and reclaiming orphaned or exhausted oil and gas operations.
- Evaluate public use of oil and gas access roads.
- Address visitor safety issues related to oil and gas operations.
- Provide for a range of reasonable alternatives for managing oil and gas operations, and assess potential impacts on park resources such as threatened and endangered species, soils, wetlands, wildlife, cultural resources, and public safety, while allowing for the exercise of oil and gas rights.
- Provide the framework to achieve sound decision-making and resource protection at BISO and OBRI for the next 15 to 20 years.

A scoping brochure will be available summarizing the purpose, need and objectives of the O&GMP/EIS. Copies of that information may be obtained by visiting the NPS public comment and planning Web site at <http://parkplanning.nps.gov/biso>, or from the Office of the Superintendent, Big South
