National Agricultural Statistics Service

Title: Floriculture Survey.

OMB Control Number: 0535-0093.

Summary of Collection: The primary function of the National Agricultural Statistics (NASS) is to prepare current official state and national estimates of crop and livestock production. Since 1985 Congress has provided funds to conduct an annual Commercial Floriculture Survey that provides basic data on this important and growing industry. General authority for these data collection activities is granted under U.S. Code Title 7, Section 2204. This statute specifies that "The Secretary of Agriculture shall procure and preserve all information concerning agriculture which can be obtained by the collection of statistics * * * and shall distribute them among agriculturists". The floriculture industry accounts for about 7 percent of agricultural cash receipts at the U.S. level. The survey is conducted in 36 states, which ensures 97 percent coverage of the U.S. value of production.

Need and Use of the Information: NASS will collect information to assess alternative agriculture opportunities. Data from the survey will provide statistics for Federal and State agencies to monitor the use of agricultural chemicals. If the information is not collected data users could not keep abreast of changes.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 13,600.

Frequency of Responses: Reporting: Annually.

Total Burden Hours: 6,057.
