Title: ENERGY STAR Program in the Residential Sector.

Abstract: The Environmental Protection Agency (EPA) introduced ENERGY STAR in 1992 to label energy efficient computers. Since then, EPA and the Department of Energy (DOE) have expanded the ENERGY STAR Program to promote energy efficiency in over 40 product categories and in commercial and residential buildings. Increased energy efficiency through ENERGY STAR provides cost savings to businesses and homeowners, reduces greenhouse gas emissions from power plants, and increases U.S. energy security and reliability. EPA announced ENERGY STAR for New Homes in 1995 as part of its effort to promote energy efficient construction in the new homes market. EPA rolled out its existing homes effort in 2000 to promote cost-

effective upgrades to the existing homes market. These two efforts promote home envelope improvements such as the proper installation of adequate insulation, and installation of energy efficient windows, lights, and appliances. Currently, partners to these two ENERGY STAR efforts are not required to report information to EPA. Information received to date has been submitted voluntarily to EPA and is not of a confidential nature. EPA believes that industry feedback is essential for EPA to ensure that ENERGY STAR meets partners' expectations in participating in a voluntary program promoting energy efficiency, and EPA's expectations for educating the public about energy efficiency and its impact on air pollution. EPA has developed this ICR to obtain authorization to collect information from the public, including businesses, for the following activities:

ENERGY STAR Partnership: An organization interested in joining ENERGY STAR as a partner is asked to submit a partnership agreement establishing their commitment to ENERGY STAR. Partners agree to undertake efforts such as educating staff and the public about their partnership with ENERGY STAR, developing and implementing a plan to improve energy performance in homes, and highlighting achievements utilizing the ENERGY STAR brand. Partners are encouraged to undertake related activities for added benefit and/or public recognition, such as committing to build 100% ENERGY STAR qualified new homes. Information collected is used to inform the public of organizations that build and promote ENERGY STAR qualified homes and make energy-efficient improvements to existing homes. Partnership is voluntary and can be terminated at any time. EPA does not expect organizations to join the program unless they expect participation to be cost-effective and otherwise beneficial for them.

Outreach Partnership: Partners have the opportunity to participate in an outreach partnership with EPA to develop public education campaigns featuring the benefits of ENERGY STAR qualified homes. Partners interested in participating in the outreach program are asked to submit a form detailing their level of participation.

ENERGY STAR Awards: Each year partners are eligible for an ENERGY STAR award, which recognizes organizations demonstrating outstanding support in promoting ENERGY STAR. This award program provides partners public recognition and market differentiation. An application form is submitted to EPA by

partners interested in being eligible for an award.

Quarterly Reporting: Partners are asked to submit information each calendar quarter to assist EPA in tracking and measuring progress in building and promoting ENERGY STAR qualified homes. This includes submitting quarterly updates on partners' level of activity in qualifying new homes for the ENERGY STAR label and activity in improving the energy efficiency of existing homes. This information is used by EPA to determine ENERGY STAR's impact on the market for energy efficient new and existing homes, its impact on residential energy demand and air pollution, and to recognize partners for promoting energy efficient homes.

Evaluation: Partners and other program participants are asked to periodically submit information to EPA as needed to assist in evaluating ENERGY STAR's effectiveness in helping organizations promote energy efficiency in homes, to assess partners' level of interest and ability in promoting ENERGY STAR in the residential sector, and to determine the impact that ENERGY STAR has on the supply and demand for energy-efficient homes and home improvement products and services. This information is used by EPA to make changes to ENERGY STAR's outreach efforts to better serve the needs of partners.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of

information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Home Builders, Home Energy Verification Organizations, Lenders, Regional Energy Efficiency Programs/Utilities, Home Improvement Contractors, Product Retailers, Manufactured Home Retailers, Realtors, Architects.

Estimated Number of Respondents: 1,441.

Frequency of Response: On occasion, quarterly, annually.

Estimated Total Annual Hour Burden: 175,449.

Estimated Total Annual Cost: \$9,133,098, which includes \$8,320 annualized capital/startup costs, \$120,358 annual O&M costs, and \$9,004,420 annual labor costs.

Dated: May 23, 2006.

Oscar Morales,

Director, Collection Strategies Division.
