All Producers/Exporters from Spain .....	33.68

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This submission under the Paperwork Reduction Act represents a request for extension of a currently approved collection by the Department of Commerce's National Institute of Standards and Technology. The Advanced Technology Program (ATP) provides cost-shared multi-year funding to single companies and to industry-led joint ventures to accelerate the development of challenging, high-risk technologies that promise significant commercial payoffs and widespread benefits for the nation. This government-industry partnership aids companies in accelerating the development of emerging or enabling technologies that lead to revolutionary new products and industrial processes and services that can compete in rapidly changing world markets. ATP challenges the research and development community to take on higher technical risk with commensurately higher potential

payoffs for the nation than they would otherwise pursue. This request is for the information collection requirements associated with completing project surveys once an award is granted. The intent of the collection is to meet statutory requirements for ATP, as well as compliance with 15 CFR part 14 and the Government Performance and Results Act.

##### II. Method of Collection

The baseline, quarterly, anniversary, and closeout business reports are submitted in a Web-based survey instrument. The post-project survey report is conducted as a telephone survey interview and supplemented with a Web-based survey instrument.
