

average income of \$7,520, while large ones had an average income of \$1.042 million.

Meat packing establishments (NAICS 311611), and meat and meat product wholesale traders (NAICS 422470) might be affected (Source: U.S. Census Bureau, 1997 Economic Census, Wholesale Trade-Subject Series, August 2000). Under SBA standards, meat packing establishments with no more than 500 employees and meat and meat product wholesale traders with no more than 100 employees are considered small. In 1997, there were 1,393 companies in the United States that processed and sold meat. More than 95 percent of these establishments are considered to be small entities and had average sales of \$9.7 million, while large meat packers had average sales of \$603 million. In 1997, there were total of 3,150 meat and meat product wholesale traders in the United States (Source: SBA and 1997 Economic Census). Of these establishments, 3,084 (97.9 percent) employed not more than 100 employees and are, thus, considered small by SBA standards. Small wholesalers had average sales of \$8.85 million, while large entities had average sales of \$348 million. Thus, predominant numbers of producers, packers and wholesale traders are considered to be small by SBA standards. Average sales of even the smallest packers and wholesalers are large compared to the quantities expected to be imported from Namibia. Furthermore, any impact on these entities would likely be positive since imports would increase the supply.

We have only limited information with regard to the production, demand, price, trade of game meat, or the number of small entities involved in these businesses. We welcome any information that the public may offer in this area.

The only alternative to the proposed rule would involve not changing the current regulations regarding the importation of beef, sheep, and goat meat and game meat from Namibia. This alternative would not meet the needs of importers who are attempting to establish a new source of supply for red meat and would deny both businesses and consumers the benefits of widened choices. The proposed rule provides the safeguarding measures appropriate to the risk associated with importation of this type of animal product. The proposed rule also enhances a positive trade environment between Namibia and the United States. We note again that Namibia is not currently eligible to export ruminant meat products to the United States under the FSIS

regulations cited earlier in this document; there would, therefore, be no economic effects on U.S. entities until establishments in Namibia were approved to export ruminant meat and other products to the United States.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

SUPPLEMENTARY INFORMATION:**I. Background**

Women-owned businesses have been regarded as the fastest growing segment of the business community in the United States. Although between 1997 and 2002 the growth rate in the number of women-owned small businesses (WOSBs) was almost twice that of all firms, WOSBs have not received a commensurate increase in their share of Federal contracting dollars.

Several congressional and executive efforts over the years to increase Federal contracting with WOSBs have not enhanced the WOSB share of Federal contracting dollars as much as anticipated. For example, in 1979, when Executive Order 12138 charged Federal agencies with responsibility for providing procurement assistance to women-owned businesses, WOSBs received only 0.2 percent of all Federal procurements. More than 9 years later, the percentage of WOSB Federal procurements had grown to only one percent. Similarly, in 1988, the Women's Business Ownership Act, Public Law 100-588 (Oct. 25, 1988), was enacted to assist women in starting, managing and growing small businesses. This program has been successful in assisting thousands of women in obtaining business financing and in business formation, but has enjoyed less success in the Federal procurement arena.

Section 7106 of the Federal Acquisition Streamlining Act (FASA), Public Law 103-355 (Oct. 13, 1994), amended the Small Business Act (the Act) by establishing a target that would result in greater opportunities for women to compete for Federal contracts. FASA, among other things, amended the Small Business Act (the Act) by establishing a government-wide goal for participation by WOSBs in procurement contracts of not less than 5 percent of the total value of all prime

contract and subcontract awards for each fiscal year. FASA also directed that WOSBs, like other small businesses and small disadvantaged businesses (SDBs), have the maximum practicable opportunity to become subcontractors for Federal contracts exceeding \$100,000, and it mandated that WOSBs be included in subcontracting plans required under Section 8(d) of the Act, 15 U.S.C. 637(d).

Federal Procurement Data System (FPDS) data indicates that since fiscal year (FY) 1996, Federal agencies have not met the separate 5 percent government-wide WOSB goal for prime contracts and subcontracts. However, the share of Federal prime contracting dollars to WOSBs has increased over the years. For example, in FY 2000, WOSBs received 2.3 percent of the approximately \$200 billion in Federal prime contract awards. The share of WOSB prime contract awards increased to 2.49 percent in FY 2001, and again to 2.90, 2.98, and 3.03 percent in FYs 2002, 2003 and 2004, respectively. Nonetheless, the total percent of WOSB prime contract awards stills falls short of the statutory goal of 5 percent.

The Government Accountability Office (GAO) published a report in February 2001 discussing the trends and obstacles in Federal contracting with WOSBs since FY 1996. See *Trends and Challenges in Contracting With Women-Owned Small Businesses*, GAO-01-346. In that report, GAO noted that contracting officials complain that one of the primary obstacles in achieving the statutory five percent WOSB goal was the absence of a "targeted government program for contracting with WOSBs."

Section 811 of the Small Business Reauthorization Act of 2000, Public Law 106-554, provided such a mechanism. Section 811, enacted on December 21, 2000, amended the Act by adding a new section 8(m), 15 U.S.C. 637(m), authorizing contracting officers to restrict competition to eligible WOSBs for certain Federal contracts in industries in which SBA has determined that WOSBs are underrepresented or substantially underrepresented in Federal procurement. The new section 8(m) of the Act explicitly limits the contracting officer's authority to restrict competition to contracts not exceeding \$3 million (\$5 million for manufacturing). It further requires SBA to conduct a study to identify the industries in which WOSBs are underrepresented and substantially underrepresented in Federal procurement and requires the head of any department or agency to provide SBA with any information that SBA deems necessary to conduct the study.
