

participation" under ICR 1949.03. The estimated hours for program participation were dramatically overestimated in the previous ICR, and EPA has determined therefore that these hours were incorrect. Specifically, EPA estimated significant burden for "compliance demonstration, EMS documentation and reporting, continuous performance demonstration, and reporting and public outreach." This burden was not correctly estimated, nor attributable to information collection requirements of the Performance Track Program. Other areas that contributed to the decrease in burden hours are application and renewal application hours, incentives hours, and annual performance reporting hours. Estimated burden hours per facility for the customer satisfaction survey have not changed. Finally, EPA has gained tremendous experience in the last three years about implementing its Performance Track Program, and assessing information collection burden in ICR amendments 1949.03 and 1949.04. As a result of this experience, EPA believes that current estimates in ICR 1949.05 to be significantly more accurate than previous estimates.
