There were no public comments received as a result of publishing in the **Federal Register** a 60-day Notice of Intention to Request Clearance of Information Collection for this survey. However, comments were solicited from the following professionals associated with volunteerism and volunteer administration:

Tom Benjamin, President, EASI (Environmental Alliance for Senior Involvement).

Betty Stallings, Volunteerism Consultant, BBS (Building Better Skills), Author of the 60-minute Module Series on volunteer management customized by the NPS for the VIP program.

Katie Campbell, Certified Volunteer Administrator, Volunteerism Consultant, and former Executive

Director of AVA (Association of Volunteer Administration).

John Throop, Executive Director of AVA.

Robb Hampton, Director, NPLD (National Public Lands Day).

Gail Cunningham, Vice President, Managing Director, Great American Cleanup (Keep America Beautiful).

Nancy Macduff, Volunteerism Consultant, Macduff/Buff Associates.

Christopher Toppe, Senior Social Scientist, Points of Light Foundation.

Solicited comments from experts in the field of volunteerism indicate that the 60-day notice is clear and to the point. This assessment is long overdue and it can yield invaluable information that can help ensure the sustainability of volunteer involvement within the National Park Service. A wide range of variables is urged as part of the data collection. Long-term and short-term volunteers have different perspective and it's important to survey a wide variety of people. To address these points, the National Park Service will be surveying a completely random selection made from over 22,900 volunteer names collected servicerwide and will be cutting the data by region work category, and volunteer program size. This will also address another's comment on the need to match the survey sample to the demographic sample of the current VIP program. A concern was also expressed about the volunteer survey being the only source of information contributing to this program assessment and that it is important to hear from those who are the recipients of the volunteers' efforts. The National Park Service has also surveyed its paid staff prior to this notice to gather this opinions of the volunteer program and its operation. Through its Social Science program, the National Park Service surveys its visitors and other customers regularly who also benefit from volunteer services. Additional comments include: The burden hour estimate seems reasonable and accurate. Utilizing both the survey and then subsequent focus groups will yield both qualitative and quantitative results. Utilizing electronic survey tools will ensure the highest possible response rate and will minimize staff time for tabulating the results. The addition of focus groups will provide additional information that may not be captured with a survey tool. This dual approach makes sense and is realistic in terms of staff resources. In response to the latter, the National Park Service will not be conducting the focus groups and interviews immediately after this information collection is complete but, rather, will seek approval and
