

SUPPLEMENTARY INFORMATION: EKPC proposes to construct a 345 kV transmission line between a source substation at the J.K. Smith Power Station in Clark County and a proposed switching station located near Lancaster, Kentucky. The proposed line would be constructed within one of several corridors under consideration. The proposed corridors are located in Clark, Madison, and Garrard counties. The proposed corridors extend southwesterly from the J.K. Smith Power Station near Trapp, KY. From Trapp, the corridors will extend towards the communities of Union City, Redhouse, and White Hall to the north side of Richmond. From Richmond the corridors head in the southwesterly direction near communities such as Roundhill, Kirksville, Ruthton, Teatersville, McCreary, Nina, and Three Forks towards the proposed location of a 345kV switching station. The proposed switching station would be located west of the community of Lancaster. The transmission line would require a right-of-way of 150 feet. Depending on which route is chosen the approximate length of the transmission line would be from 35–37 miles. It is anticipated that this transmission line would be in service in late spring to early summer of 2009.

Alternatives considered by USDA Rural Development and EKPC include: (a) No action, (b) alternative transmission improvements, and (c) alternative transmission line corridors.

An Electric Alternative Evaluation and Macro Corridor Study Report, prepared by EKPC will be presented at the public scoping meeting. The Report is available for public review at the addresses provided in this notice.

Government agencies, private organizations, and the public are invited to participate in the planning and analysis of the proposed project. Representatives from USDA Rural Development and EKPC will be available at the scoping meeting to discuss USDA Rural Development's environmental review process, describe the project, the need for the project, the macro corridors under consideration, and discuss the scope of environmental issues to be considered, answer questions, and accept oral and written comments.

Questions and comments should be received by USDA Rural Development in writing by August 10, 2006 to ensure that they are considered in this environmental impact determination.

The comments received will be incorporated into the environmental analysis EKPC will submit to USDA Rural Development for review. USDA

Rural Development will use the environmental analysis to determine the significance of the impacts of the project and may adopt it as its environmental assessment of the project. USDA Rural Development's environmental assessment of the project would be available for review and comment for 30 days. Should USDA Rural Development determine, based on the EA of the project, that the project would not have a significant environmental impact, it will prepare a finding of no significant impact. Public notification of a finding of no significant impact would be published in the **Federal Register** and in newspapers with a circulation in the project area. Any final action by USDA Rural Development related to the proposed project will be subject to, and contingent upon, compliance with environmental review requirements as prescribed by the Council on Environmental Quality and USDA Rural Development environmental policies and procedures.
