#### RIN 2120-AA64

Airworthiness Directives; McDonnell Douglas Model DC–9–31, DC–9–32, DC–9–32F, DC–9–33F, DC–9–34, and DC–9–34F Airplanes; and Model DC–9– 40 and DC–9–50 Series Airplanes

**AGENCY:** Federal Aviation Administration (FAA), Department of Transportation (DOT). **ACTION:** Final rule.

**SUMMARY:** The FAA is adopting a new airworthiness directive (AD) for certain transport category airplanes, identified above. This AD requires installing a bonding jumper from the boost pump volute to the fuel tank structure, and related investigative/corrective actions. This AD results from fuel system reviews conducted by the manufacturer. We are issuing this AD to prevent point-contact arcing or filament heating in the fuel tank, which, in the event of a short or ground fault inside the fuel tank, could result in a fuel tank explosion and consequent loss of the airplane.

**DATES:** This AD becomes effective August 9, 2006.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of August 9, 2006.

**ADDRESSES:** You may examine the AD docket on the Internet at *http://dms.dot.gov* or in person at the Docket Management Facility, U.S. Department of Transportation, 400 Seventh Street SW., Nassif Building, Room PL–401, Washington, DC.

Contact Boeing Commercial Airplanes, Long Beach Division, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Data and Service Management, Dept. C1–L5A (D800–0024), for service information identified in this AD.

The Docket Management Facility office (telephone (800) 647–5227) is located on the plaza level of the Nassif Building at the street address stated in the **ADDRESSES** section.

#### Discussion

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to certain McDonnell Douglas transport category airplanes. That NPRM was published in the **Federal Register** on April 13, 2006 (71 FR 19140). That NPRM proposed to require installing a bonding jumper from the boost pump volute to the fuel tank structure, and related investigative/ corrective actions.
