

minimal reasonable activity levels (Reduced Operations Alternative), to the highest reasonable activity levels that could be supported by current facilities, plus the potential expansion and construction of new facilities for existing capabilities and for specifically identified future actions (Expanded Operations Alternative). The No Action Alternative would continue current mission support work at LANL and includes approved interim actions and facility construction, expansions or modifications, and decontamination and decommissioning for which NEPA impact analysis has already been completed. All alternatives assume LANL will continue to operate as a NNSA national security laboratory for the foreseeable future.

Following the end of the public comment period described above, the NNSA will consider and respond to the comments received, and issue the Final LANL SWEIS. The NNSA will consider the environmental impact analysis presented in the Final LANL SWEIS, along with other information, in determining the Record of Decision for the continued operation of LANL.

Signed in Washington, DC, this 26th day of May 2006.

Thomas P. D'Agostino,

Acting Administrator, National Nuclear Security Administration.
