

SUPPLEMENTARY INFORMATION: The **Federal Register** notice seeking comments from the public on a request to OMB to extend information collection activities was published in the **Federal Register** on January 9, 2006 (71 FR 1452). Only one comment was received that was not directly related to the notice and was addressed by making the requested change on a referenced list of contact persons. You are advised that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information that does not display a valid OMB clearance number. For the Self-Governance collection of information, the response is voluntary, to obtain or retain a benefit, depending upon the parts of the program being addressed.

The Self-Governance program was authorized by the Tribal Self-Governance Act of 1994, Public Law 103-413, as amended. Tribes interested in entering into Self-Governance must submit certain information as required by Public Law 103-413, as amended, to support their admission into Self-Governance. In addition, those tribes and tribal consortia who have entered into self-governance funding agreements will be requested to submit certain information as described in the negotiated rules published in final form on December 15, 2000 (65 FR 78688). This information will be used to justify a budget request submission on their behalf and to comport with section 405 of the Act that calls for the Secretary to submit an annual report to the Congress.

You may submit comments about the collection to evaluate the following:

(a) The accuracy of the burden hours, including the validity of the methodology used and assumptions made;

(b) The necessity of the information for proper performance of the bureau functions, including its practical utility;

(c) The quality, utility, and clarity of the information to be collected; and,

(d) Suggestions to reduce the burden including use of automated, electronic, mechanical, or other forms of information technology.

Please submit your comments to the persons listed in the **ADDRESSES** section. Please note that comments, names and addresses of commentators, will be available for public review during regular business hours. If you wish your name and address withheld from the public, you must state this prominently at the beginning of your comments. We will honor your request to the extent allowable by law.

OMB is required to make a decision concerning this information collection request between 30 and 60 days after

publication of this document in the **Federal Register**. Therefore, a comment will receive the best consideration by OMB if it is submitted early during this comment period.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR Part 210—Forms and Reports and Part 216—Production Accounting.

OMB Control Number: 1010-0139.

Bureau Form Number: Forms MMS-4054 and MMS-4058.

Abstract: The Secretary of the U.S. Department of the Interior is responsible for collecting royalties from lessees who produce minerals from leased Federal and Indian lands. The Secretary is required by various laws to manage mineral resources production on Federal and Indian lands, collect the royalties due, and distribute the funds in accordance with those laws.

The Secretary also has a trust responsibility to manage Indian lands and seek advice and information from Indian beneficiaries. The MMS performs the royalty management functions and assists the Secretary in carrying out the Department's trust responsibility for Indian lands.

When a company or an individual enters into a lease to explore, develop, produce, and dispose of minerals from

Federal or Indian lands, that company or individual agrees to pay the lessor a share (royalty) of the value received from production from the leased lands. The lease creates a business relationship between the lessor and the lessee. The lessee is required to report various kinds of information to the lessor relative to the disposition of the leased minerals. Such information is similar to data reported to private and public mineral interest owners and is generally available within the records of the lessee or others involved in developing, transporting, processing, purchasing, or selling of such minerals. The information collected includes data necessary to ensure that the royalties are accurately valued and appropriately paid.

The MMS financial accounting system is an integrated computer system that includes production reports submitted by lease/agreement operators and is designed to track minerals produced from Federal and Indian lands from the point of production to the point of disposition, or royalty determination, and/or point of sale. The financial accounting system also includes payment and sales volumes and values, as reported by payors. The production and royalty volumes are compared to verify that proper royalties are received for the minerals produced.

The production reports provide MMS with ongoing information on lease, unit, or communitization agreement (lease/agreement) and facility production, sales volumes, and inventories. The reports summarize all operations on a lease/agreement or facility during a reporting period. They identify production by the American Petroleum Institute well number and sales by product. Data collected are used as a method of cross-checking reported production with reported sales. Failure to collect this information will prevent MMS from ensuring that all royalties owed on lease production are accurately valued and appropriately paid. Additionally, the data is shared electronically with the Bureau of Land Management, MMS's Offshore Minerals Management, Bureau of Indian Affairs, and tribal and state governments so they can perform their lease management responsibilities. The requirement to report accurately and timely is mandatory.

Form MMS-4054, Oil and Gas Operations Report (OGOR)

This three-part form, submitted monthly, identifies all oil and gas lease production and dispositions. The form is used for all production reporting for Outer Continental Shelf, Federal, and

Indian lands. Monthly production information is compared with monthly sales and royalty data submitted on Form MMS-2014, Report of Sales and Royalty Remittance (OMB Control Number 1010-0140, expires October 31, 2006), to ensure proper royalties are paid on the oil and gas production reported to MMS. To modify previously submitted reports, the operator has the option of modifying the reporting line (delete/add by detail line) or replacing (overlying) the previous report. The MMS uses the information from Parts A, B, and C of the OGOR to track all oil and gas from the point of production to the point of first sale or other disposition.

OGOR Part A—Well Production. All operators submit Part A for each lease or agreement with active wells until such wells are abandoned and inventories are disposed. Each line identifies a well/producing interval combination showing well status; days on production; volumes of oil, gas, and water produced; and any volumes injected during the report month.

OGOR Part B—Product Disposition. For any month with production volumes, operators submit Part B to identify the sales, transfers, and lease use of production reported on Part A. A separate line for each disposition shows: (1) The volume of oil, gas, or water; (2) the sales meter or other meter identifier; (3) the gas plant for instances where gas was processed prior to royalty determination; and (4) the quality of production sold.

OGOR Part C—Product Inventory. The lease operators who store their production before selling it must submit Part C. Separate lines for each product identify the storage facility; sales meter if applicable; quality of production sold; beginning and ending storage inventory; volume of sales; and volumes of other gains and losses to inventory.

Form MMS-4058, Production Allocation Schedule Report (PASR)

This form is submitted monthly by operators of the facilities and measurement points where production from an offshore lease or metering point is commingled with production from other sources before it is measured for royalty determination.

Each line identifies a lease or metering point and allocated sales or transferred volumes. Space is provided on each detail line for the operator's property name (area/block), and a column is provided to identify the product that was injected into the pipeline system. To modify previously submitted reports, the operator has the option of modifying (delete/add by detail line) or replacing (overlying) the

previous report. The MMS uses the data to determine whether sales reported by the lessee are reasonable.

Agency Information Collection Activities: Submitted for Office of Management and Budget (OMB) Review; Comment Request

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of a revision of a currently approved information collection (OMB Control Number 1010-0087).

SUMMARY: To comply with the Paperwork Reduction Act of 1995 (PRA), we are notifying the public that we have submitted to OMB an information collection request (ICR) to renew approval of the paperwork requirements in the regulations under 30 CFR parts 227—Delegation to States; 228—Cooperative Activities with States and Indian Tribes; and 229—Delegation to States. This notice also provides the public a second opportunity to comment on the paperwork burden of these regulatory requirements. This ICR is titled “30 CFR Part 227—Delegation to States; 30 CFR Part 228—Cooperative Activities with States and Indian Tribes; and 30 CFR Part 229—Delegation to States.” We changed the title of this ICR to clarify the regulatory language we are covering under 30 CFR parts 227, 228, and 229 and to reflect OMB approval of consolidation of two ICRs, titled:

- ICR 1010-0087: 30 CFR Part 228—Cooperative Activities with States and Indian Tribes; and
- ICR 1010-0088: 30 CFR Part 227—Delegation to States.

In the two ICRs, much of the general information was repeated and cross-referenced. This consolidated ICR 1010-0087 eliminates that duplication of effort and redundancy of data and also includes 30 CFR part 229 information collection burden hours, which were not included in the previous information collections (ICRs 1010-0087 and 1010-0088).

DATES: Submit written comments on or before August 11, 2006.

When a company or an individual enters into a lease to explore, develop, produce, and dispose of minerals from Federal or Indian lands, that company or individual agrees to pay the lessor a share (royalty) of the value received from production on leased lands. The lease creates a business relationship between the lessor and the lessee. The

Sections 202 and 205 of the Federal Oil and Gas Royalty Management Act of 1982 (FOGRMA), as amended, authorized the Secretary to develop delegated and cooperative agreements with states and Indian tribes to carry out certain inspection, auditing, investigation, or limited enforcement activities for leases in their jurisdiction. The states and Indian tribes are working partners and are an integral part of the overall onshore and offshore compliance effort.
