

acid or with iopanoic acid. These macromolecular imaging agents have clearance properties that mimic the pharmacokinetic properties of co-administrated drugs, so as to be useful in quantifying the range and dosage level of therapeutic drugs using MR imaging.

E-206-2000 "Method for increasing the distribution of therapeutic agents:" "Method for increasing the distribution of nucleic acids." The invention pertains to the reliance of therapies on the local parenchymal delivery of macromolecules or nucleic acids for success. However, the volume of distribution of many of these potential therapeutic agents is restricted by their interactions with the extracellular matrix and cellular receptors. Heparin-sulfate proteoglycans are cell surface components which bind to an array of molecules such as growth factors, cytokines and chemokines and viruses such as cytomegalovirus, herpes simplex virus and HIV. The invention provides a method of dramatically increasing the volume of distribution and effectiveness of certain therapeutic agents after local delivery by the use of facilitating agents as described in Neuroreport. 2001 Jul 3;12(9):1961-4 entitled "Convection enhanced delivery of AAV-2 combined with heparin increases TK gene transfer in the rat brain" and in Exp Neurol. 2001 Mar;168(1):155-61 entitled "Heparin coinfusion during convection-enhanced delivery (CED) increases the distribution of the glial-derived neurotrophic factor (GDNF) ligand family in rat striatum and enhances the pharmacological activity of neurturin." These methods are especially useful when used in conjunction with technology described and claimed in the convection enhanced delivery technology claimed in U.S. patent 5,720,720

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within sixty (60) days from the date of this published notice. NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Properly filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released

under the Freedom of Information Act, 5 U.S.C. 552.

Dated: July 5, 2006.

David R. Sadowski,

Acting Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

BILLING CODE 4140-01-M

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

Welcome to the United States Survey

AGENCY: Office of the Secretary, Office of Policy, Private Sector Office, DHS.

ACTION: Emergency submission to OMB, comment request.

The Department of Homeland, Office of the Secretary, Private Sector Office has submitted the following (see below) information collection request (ICR), utilizing emergency review procedures, to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. chapter 35). OMB approval has been requested by July 30, 2006. A copy of this ICR, with applicable supporting documentation, may be obtained by calling the Departmental Clearance Officer.

Comments and questions about the ICR listed below should be forwarded to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Department of Homeland Security, Office of Management and Budget, Room 10235, Washington, DC 20503 (OMB phone number). The Office of Management and Budget is particularly interested in comments which: [set asterisks]

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other

technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses. [end asterisks]

Agency: Department of Homeland Security, Office of the Secretary, Office of Policy, Private Sector Office.

Title: Welcome to the United States Survey.

OMB Number: 1601-NEW.

Frequency: One-time collection.

Affected Public: Foreign visitors into the U.S.

Number of Respondents: 939.

Estimated Time Per Respondent: 5 minutes.

Total Burden Hours: 78.25 hours.

Total Burden Cost (capital/startup): \$0.00.

Total Burden Cost (operating/maintaining): \$0.00.

Description: The Department of Homeland Security (DHS), Office of Policy, Private Sector Office in conjunction with Customs and Border Protection (CBP) and Research Triangle Institute, International, will interview foreign visitors entering the United States at four southern border ports of entry, three northern border ports of entry and four airport ports of entry before the Labor Day holiday in August 2006. This survey will measure how CBP is serving the American public with vigilance and integrity, while providing courteous and helpful treatment to visitors, immigrants and travelers. Additionally, this survey will further the Rice-Chertoff Initiative as has been announced by evaluating the two model airports (Dulles International Airport, Chantilly, VA, and Houston International Airport, Houston, TX) for baseline information as well as how welcomed foreign visitors feel upon entering the United States and interacting with a DHS Customs and Border Protection officer.

Scott Charbo,

Chief Information Officer.
