[I.D. 062306B]

**Review Workshop Report and Final Stock Assessment Report for Large Coastal Sharks**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of availability.

**SUMMARY:** NMFS announces the availability of the large coastal shark (LCS) final stock assessment report, prepared by the NMFS Southeast Fisheries Science Center (SEFSC). The report includes a copy of the recently completed review panel consensus summary, as well as copies of the Data and Assessment workshop reports. These reports summarize the relevant working documents; describe models and methods used to assess the status of the LCS complex, sandbar sharks, and Atlantic and Gulf of Mexico stocks of blacktip sharks; make general and research oriented recommendations; summarize stakeholder opinion for each of the stocks assessed; and make conclusions regarding the status of the stock.

**ADDRESSES:** Requests for copies of the LCS final stock assessment report should be sent to Sarah McTee, Highly Migratory Species Management Division (F/SF1), National Marine Fisheries Service (NMFS), 1315 East-West Highway, Silver Spring, MD 20910, or may be sent via facsimile (fax) to (301) 713-1917 or phone (301) 713-2347. Electronic copies of the stock assessment may also be obtained from the SEFSC SEDAR Web site at: <http://www.sefsc.noaa.gov/sedar/Index.jsp>.

**FOR FURTHER INFORMATION CONTACT:** For information on the methods, data, and results of the stock assessment, contact Julie Neer by phone at (850) 234-6541 or by fax at (850) 235-3559.

**SUPPLEMENTARY INFORMATION:** Stock assessments are periodically conducted to determine stock status relative to current management criteria. Collecting the best available scientific data and conducting stock assessments are critical to determine appropriate management measures for rebuilding stocks. The latest LCS stock assessment was conducted in a manner similar to the Southeast Data, Assessment, and Review (SEDAR) process. SEDAR is a cooperative process initiated in 2002 to improve the quality and reliability of

fishery stock assessments in the South Atlantic, Gulf of Mexico, and U.S. Caribbean. SEDAR emphasizes constituent and stakeholder participation in assessment development, transparency in the assessment process, and a rigorous and independent scientific review of completed stock assessments.

SEDAR is organized around three workshops. The first workshop is a Data workshop where datasets are documented, analyzed, reviewed, and compiled for conducting assessment analyses. The LCS Data workshop was held from October 31 through November 4, 2005, in Panama City, FL. The second workshop, an Assessment workshop where quantitative population analyses are developed and refined and population parameters are estimated, was held from February 6 through February 10, 2006, in Miami, FL. The last workshop was the Review workshop, in which a panel of independent experts reviewed the data and assessments and recommended the most appropriate values of critical population and management quantities. This workshop was held in Panama City, FL, from June 5 through June 9, 2006. All workshops were open to the public. More information on the SEDAR process can be found at <http://www.sefsc.noaa.gov/sedar>.

[I.D. 071206A]

**Endangered and Threatened Species; Take of Anadromous Fish**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

**ACTION:** Receipt of application for research permit 1583 and request for comment.

**SUMMARY:** Notice is hereby given that NMFS has received an application for a permit for an Endangered Species Act (ESA) scientific research from Tenera Environmental in Lafayette, CA. This notice is relevant to federally

endangered Sacramento River winter-run Chinook salmon (*Oncorhynchus tshawytscha*), threatened Central Valley spring-run Chinook salmon (*O. tshawytscha*), threatened Central Valley steelhead (*O. mykiss*), and threatened Southern Distinct Population Segment (DPS) of North American green sturgeon (*Acipenser medirostris*). This document serves to notify the public of the availability of the permit applications for review and comment.

**DATES:** Written comments on the permit application must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific Standard Time on August 23, 2006.

**ADDRESSES:** Written comments on the permit application should be sent to the appropriate office as indicated below. Comments may also be sent via e-mail to [FRNpermit.sac@noaa.gov](mailto:FRNpermit.sac@noaa.gov) or fax to the number indicated for the request. The application and related documents are available for review by appointment: Protected Resources Division, NMFS, 650 Capitol Mall, Suite 8-300, Sacramento, CA 95814 (ph: 916-930-3615, fax: 916-930-3629).

**FOR FURTHER INFORMATION CONTACT:** Russell Bellmer, Ph.D., at phone number 916-930-3615, or e-mail: [FRNpermit.sac@noaa.gov](mailto:FRNpermit.sac@noaa.gov).

**SUPPLEMENTARY INFORMATION:****Authority**

Issuance of permits and permit modifications, as required by the Endangered Species Act of 1973 (16 U.S.C. 1531-1543) (ESA), is based on a finding that such permits/modifications: (1) Are applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Authority to take listed species is subject to conditions set forth in the permits. Permits and modifications are issued in accordance with and are subject to the ESA and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 222-226).

Those individuals requesting a hearing on the application listed in this notice should set out the specific reasons why a hearing would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NMFS. All statements and opinions contained in the permit action summaries are those of the applicant and do not necessarily reflect the views of NMFS.

**Species Covered in This Notice**

This notice is relevant to federally endangered Sacramento River winter-run Chinook salmon (*Oncorhynchus tshawytscha*), threatened Central Valley spring-run Chinook salmon (*O. tshawytscha*), threatened Central Valley steelhead (*O. mykiss*), and threatened Southern DPS of North American green sturgeon (*Acipenser medirostris*).

**Applications Received**

Tenera Environmental requests a 1-year permit 1583 for an estimated take of 32 juvenile winter-run Chinook Salmon, 85 juvenile spring-run Chinook Salmon, and 6 juvenile Central Valley steelhead to fulfill the requirements of the U.S. Environmental Protection Agency and provide current impingement data as requested by NMFS, U.S. Fish and Wildlife Service, and California Department Fish and Game. Tenera Environmental requests authorization for an estimated total take of 123 juveniles (with 100-percent incidental mortality) resulting from rinsing all impinged material from the traveling screens into the screenwash

sluiceways and directing it by water flow and gravity into a collection container. Sampling will occur once every 4 hours for one 24-hour collection period per week for 12 consecutive months (312 samples) at the Contra Costa Power Plant (lat. 38° 01'12" N, long. 121° 45'36" W) and Pittsburg Power Plant (lat. 38°02'28" N, long. 121° 53'38"W) located in the Suisun Bay of San Francisco Bay Delta. If any listed species are collected alive, they will be immediately returned to Suisun Bay. Individuals are measured and identified to species or run.

Tenera Environmental will take a total of six juveniles of the threatened Southern DPS of North American green sturgeon (with 100-percent incidental mortality) resulting from capture and release of the fish.

Dated: July 18, 2006.
