Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2005-22936]

Hours of Service of Drivers; Application for Exemption; Landstar System, Inc.

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that it has received an application from Landstar System, Inc. (Landstar) for an exemption from the commercial motor vehicle (CMV) drivers' hours-of-service regulations for its drivers when transporting high-security cargo that requires constant attendance. The HOS regulation requires that CMV drivers using the sleeper-berth exception remain in the sleeper berth for at least 8 consecutive hours during one of the 2 rest periods used to accumulate the equivalent of 10 hours off duty. Landstar states that, for team-driver operations, this prevents the driver in the sleeper berth from attending to the cargo while the other driver takes a restroom break, and conflicts with requirements for all persons to exit the vehicle for a security inspection when entering certain military installations. FMCSA requests public comment on the Landstar application for exemption.

DATES: Comments must be received on or before August 30, 2006.

ADDRESSES: You may submit comments identified by Docket Number FMCSA-2005-22936 by any of the following methods:

Telephone: 202-366-4009. E-mail: MCPSD@fmcsa.dot.gov.

SUPPLEMENTARY INFORMATION:

Background

Section 4007 of the Transportation Equity Act for the 21st Century (Pub. L. 105-178, 112 Stat. 107, June 9, 1998; 49 U.S.C. 31315 and 31136(e)) provides authority to grant exemptions from motor carrier safety regulations. On December 8, 1998, the FMCSA's

predecessor published an interim final rule implementing sec. 4007 (63 FR 67600). On August 20, 2004, FMCSA published a final rule (69 FR 51589) that requires the Agency to publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity for public comment on the request and to inspect information relevant to the application, including any safety analyses that have been conducted.

The Agency reviews the safety analyses and the public comments, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If the Agency denies the request, it must state the reason for doing so. If the Agency grants the exemption, the notice must specify the person or class of persons receiving the exemption, and the regulatory provision or provisions from which exemption is being granted. The notice must also specify the effective period of the exemption (up to 2 years), and explain the terms and conditions of the exemption. The exemption may also be renewed (49 CFR 381.300(b)).

Request for Exemption

The hours-of-service (HOS) regulations for commercial motor vehicle (CMV) drivers in 49 CFR part 395 apply to motor carriers and drivers operating CMVs in interstate commerce, as defined in 49 CFR 390.5. Landstar transports sensitive cargo for the U.S. Department of Defense (DOD). Landstar states this high-risk cargo must be attended at all times as required by the Federal Motor Carrier Safety Regulations (49 CFR 397.5) and DOD regulations.

Landstar states that, during team-driver operations, the sleeper-berth requirements for at least 8 consecutive hours sleeper-berth use (49 CFR 395.1(g)(ii)(A)(1)) would not allow the first operator (driving) to stop for a comfort break because the second operator (in the sleeper) would not be allowed to attend the vehicle without interrupting his or her 8 consecutive hours in the sleeper berth.

Landstar also states that security procedures at military installations require both drivers to exit the vehicle for a security inspection when the vehicle enters the installation. For team drivers using the sleeper-berth HOS exception, the second operator would have to interrupt his or her 8 hours of
