Draft Toxicological Review of Dichlorobenzenes: In Support of Summary Information on the Integrated Risk Information System (IRIS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Extension of Public Comment Period and Rescheduled External Peer Review Panel Meeting.

SUMMARY: The EPA is extending the public comment period and rescheduling an external peer review panel meeting to review selected sections of the final draft document titled, "Toxicological Review of Dichlorobenzenes: In Support of Summary Information on the Integrated Risk Information System (IRIS)" (EPA/635/R-03/015), related to the inhalation reference concentration (RfC) and inhalation cancer assessment for 1,4-dichlorobenzene. The document was prepared by the National Center for Environmental Assessment (NCEA) within EPA's Office of Research and Development.

On July 11, 2006, EPA published a **Federal Register** notice (71 FR 39113) announcing a comment period that ended August 9 and an external peer review panel meeting that was scheduled for August 16. EPA is extending the public comment period to October 10, 2006, in response to requests. The external peer review panel meeting will be held on October 30, 2006.

As previously stated in 71 FR 39113, EPA is releasing this draft document solely for the purpose of pre-dissemination peer review under applicable information quality guidelines. This document has not been formally disseminated by EPA. It does not represent and should not be construed to represent any Agency policy or determination. EPA will consider any public comments submitted in accordance with this notice when revising the document.

DATES: The period for submission of comments on the final draft document will end on October 10, 2006. Technical comments should be in writing and must be received by EPA by October 10, 2006. Comments submitted to the EPA by October 10, 2006, will be provided to the external peer review panel prior to the teleconference meeting. The peer review panel meeting will be conducted on October 30, 2006, by teleconference

and will begin at 1 p.m. and end at 4 p.m. Members of the public may call into the teleconference meeting and are invited to provide oral statements at the commencement of the teleconference. (For more information refer to the instructions for registration provided in the **ADDRESSES** section of this notice.)

ADDRESSES: The external peer review panel meeting will be held by teleconference. Under an Interagency Agreement between EPA and the Department of Energy, the Oak Ridge Institute of Science and Education (ORISE) is organizing, convening, and conducting the peer review panel meeting. To obtain the teleconference call-in number and access code, register by October 10, 2006, by calling ORISE, P.O. Box 117, MS 17, Oak Ridge, TN 37831-0117, at (865) 576-2922 or (865) 241-3168 (facsimile). Interested parties may also register on-line at <http://www.orau.gov/dichlorobenzene>.

The draft "Toxicological Review of Dichlorobenzenes: In Support of Summary Information on the Integrated Risk Information System (IRIS)" (EPA/635/R-03/015) is available primarily via the Internet on NCEA's home page under the Recent Additions menu at <http://www.epa.gov/ncea>. A limited number of paper copies are available by contacting the IRIS Hotline at (202) 566-1676, (202) 566-1749 (facsimile), or hotline.iris@epa.gov. If you are requesting a paper copy, please provide your name, mailing address, the document title, and the EPA number of the requested publication. Copies are not available from ORISE.

Copies of the study by Aiso *et al.* (2005), referenced in the **SUPPLEMENTARY INFORMATION** section of this notice are available from the IRIS Hotline in paper or electronic format. If you are requesting a copy, please provide your name, mailing address or e-mail address, and document citation: Aiso *et al.* (2005) Carcinogenicity and chronic toxicity in mice and rats exposed by inhalation to para-dichlorobenzene for two years. *J Vet Med Sci* 67(10):1019-1029. EPA is providing this study in the interest of transparency. EPA does not endorse or support the study or its findings.

Technical comments may be submitted electronically via <http://www.regulations.gov>, by mail, by facsimile, or by hand delivery/courier. Please follow the detailed instructions provided in the **SUPPLEMENTARY INFORMATION** section of this notice.

SUPPLEMENTARY INFORMATION:

I. Information About the Document

IRIS is a database that contains Agency scientific positions on potential adverse human health effects that may result from chronic (or lifetime) exposure to specific chemical substances found in the environment. The database (available on the Internet at <http://www.epa.gov/iris>) contains qualitative and quantitative health effects information for more than 500 chemical substances that may be used to support the first two steps (hazard identification and dose-response evaluation) of the risk assessment process. When supported by available data, the database provides oral reference doses (RfDs) and inhalation reference concentrations (RfCs) for chronic health effects, and oral slope factors and inhalation unit risks for carcinogenic effects. Combined with specific exposure information, government and private entities use IRIS to help characterize public health risks of chemical substances in a site-specific situation and thereby support risk management decisions designed to protect public health.

1,4-Dichlorobenzene is widely used as a space deodorant for toilets and refuse containers, as a moth repellent in moth balls or crystals, and in other pesticide applications. The current IRIS assessment for 1,4-dichlorobenzene was placed on the database in 1994 and contains an inhalation RfC. A reassessment of the potential health effects of dichlorobenzenes has been undertaken. The draft assessment for dichlorobenzenes (including the 1,2-, 1,3-, and 1,4-isomers) was subject to an external peer review and 30-day public comment period in February 2004 (69 FR 4514, January 30, 2004). The scope of the current external peer review and public comment is limited to the analyses based on a chronic inhalation bioassay of 1,4-dichlorobenzene published in the peer-reviewed literature (Aiso *et al.*, 2005. *J Vet Med Sci* 67(10):1019-29) that was not included in the February 2004 external peer review draft. This study was identified originally as an unpublished study report by the Japan Bioassay Research Center (JBRC, 1995). Data from

Aiso *et al.* (2005) were used subsequently in the quantitative dose-response assessments for the 1,4-dichlorobenzene RfC and inhalation cancer assessment.

II. How To Submit Technical Comments to the Docket at www.regulations.gov
